Concerns Received Before Report Period	10
Concerns Received During Report Period	140

Number of Notices of Violation Issued: 0

Number of Referral Notices of Violation Issued: 2

Number of Letters of Warning Issued: 1

Please note, the information provided in this report reflects all concerns investigated during the reporting period, regardless of the date on which the original concern was received.

Monthly Air Pollution Control Program Detail Report

Concerns Received or Investigated Between April 16, 2023 and June 15, 2023

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
KCRO	4/17/2023	4/14/2023	Ryan Langley	Adrian Bates	Open Burning	DS		

Monthly Air Pollution Control Program Detail Report

Concerns Investigated Between April 16, 2023 and June 15, 2023

Note: "Concern Info" refers to the information provided to the department by the concerned party. The information seeks to accurately reflect the nature of the allegations as it was made. Those statements of allegations do not necessarily reflect the legal

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
Concern No.	53122	Concern Info	On 04-13-2023 at approximately 1735 hours, I Officer Allison made contact with the landowner of 705 ADA Street because of the illegal burning of tires that has been causing heavy black smoke smelling like burning rubber though out town. The fire has been burning for 5 days since 04-08-2023. The landowner James Langley stated that it was his son Ryan Langley who set the fire. James said that the fire caught a couple of tires on fire. I asked James if he would put out the fire. James stated that it was his son's deal and that he would tell him to put it out when he gets up in the morning. I took a few photographs of the smoke coming from the pile and placed the photographs with the report.					
Comments	The responsible party was burning brush and was unaware of the tires underneath the visible vegetation. The tires were burned unintentionally, so compliance assistance was provided. The responsible party agreed to ask the fire department to help extinguish the tires and will implement new procedures to help prevent a recurrence.							
KCRO	4/18/2023	4/18/2023	Zachary Williams	Oak Grove Jackson	Open Burning Open Dumps	DS		
Concern No.	53150	Concern Info	Sni Valley Fire called to report an illegal burn they were responding to in Oak Grove. Chief Follis stated there are tires, trash, and other things on fire. The burn pile is approximately 40 feet by 50 feet. He said there is also lots of trash and old cars on the property. He requested we send someone out right away if possible while the fire department was still there since the people at the property were somewhat hostile.					
Comments	An open burning compliance assistance report will be sent to Zachary Williams with fact sheet for open burning and solid waste management attached to it.							
KCRO	4/26/2023	4/25/2023	Jerry Rhule, Kevin Rhule, and Barbie Rhule	Warsaw Benton	Open Burning	CK

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
Concern No. 53287 Concern Info A trailer in Bent Tree Harbor is being demolished and burned in piles during the night. Please contact CP for additional information.								
Comments As a result of the investigation, Jerry Rhule, Kevin Rhule, and Barbara Rice Rhule were found out of compliance with the Missouri Air Conservation Law and its implementing regulations. No response is required since documentation was received on April 26, 2023, showing that a property owner had been provided copies of applicable portions of the open burning regulations to assist in their understanding and compliance with regulatory requirements going forward.								
KCRO	4/25/2023	4/25/2023	Unknown	Jackson	Odor	MC		
Concern No. 53294 Concern Info Experienced Odor Date and Time: Apr 21, 2023 4:30 am								
Experienced Odor Duration: 30 minutes to 1 hour								
Experienced Odor Description: Solvent or Chemical, Sweet or Fragrant								
Experienced Odor Intensity: Strong or Offensive								
Experienced Odor Address and/or Location Description: 1011 SW Lea Drive Apt A Lee's Summit Missouri 64081 At home, in bed								
Potential Source: no								
Additional Information: never smelled anything like that in my 71 plus years								
Comments Information provided is not enough to determine a possible responsible party and odor is too intermittent?. No further action can be taken until needed information is provided to Regional Office staff.

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
KCRO	4/27/2023	4/27/2023	Hendrick Collision Center	Kansas City Jackson	Odor	MC		
Concern No. 53296 Concern Info The concerned party stated that Hendrick Collision had purchased this building back in 2020 and that since then they have emitted a strong smell of paint fumes. They stated that the fumes are strong enough to give them a headache and that it burns their eyes. They also said that the time that the fumes are the strongest is between 3:00pm-4:00pm. But they have smelled the odor before as early as 12:00pm.								
Comments This concern is located within the city limits of Kansas City, MO; therefore, the concern was referred to the delegated local agency, which is the City of Kansas City Health Department's Air Quality Program.								
KCRO	4/27/2023	4/27/2023	Hendrick Collision Center	Kansas City Jackson	Odor	MC		
Concern No. 53297 Concern Info The concerned party stated that Hendrick Collision had purchased this building back in 2020, and that since then they have emitted a strong smell of paint fumes. They stated that the fumes are strong enough to give them a headache and that it burns their eyes. They also said that the time that the fumes are the strongest is between 3:00pm-4:00pm. But they have smelled the odor before as early as 12:00pm.								
Comments This concern is located within the city limits of Kansas City, MO; therefore, the concern was referred to the delegated local agency, which is the City of Kansas City Health Department's Air Quality Program.								
KCRO	5/2/2023	5/2/2023	Jaclynn Sanders	St. Joseph Buchanan	Asbestos	MC		

Monthly Air Pollution Control Program Detail Report

Concerns Investigated Between April 16, 2023 and June 15, 2023

Note: "Concern Info" refers to the information provided to the department by the concerned party. The information seeks to accurately reflect the nature of the allegations as it was made. Those statements of allegations do not necessarily reflect the legal

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
Concern No. 53421 Concern Info CP stated Jaclynn Sanders declared to be ripping up asbestos tiles in her basement on Facebook. CP wants Jaclynn to be aware of the proper safety procedures and disposal methods for asbestos.								
Comments Our asbestos regulations do not apply to single-family residential structures unless they are part of a larger project involving multiple structures. No further investigation is warranted.								
KCRO	5/5/2023	5/2/2023	Mohamed	St. Joseph Buchanan	Asbestos	MC		
Concern No. 53428 Concern Info Rolan Gibson called stating his neighbor is removing his asbestos siding two houses down, and he is concerned with the debris in the air. Rolan stated he would send me the photos he took of the asbestos.								
Comments The project appears to involve a single residential structure with four or less dwelling units; therefore, it would not be subject to Missouri's asbestos air pollution rules. The concern was referred to the City of St. Joseph's Building Development Department to see if they wanted to investigate further.								
KCRO	5/10/2023	5/4/2023	Kevin Rogers	Orrick Ray	Open Burning Scrap Tire Dump	DS		
Concern No. 53430 Concern Info The CP is concerned about her neighbors burning tires and plastic. They are located near the Missouri River and there is a lot of black smoke. They are worried about pollution. The fire department was out, but the neighbors just started burning again after the fire department left. The concern was forwarded from EPA's criminal division in Lenexa.								
Comments The only evidence of open burning observed was from the burning of household waste; no violations were observed at the time of investigation. Compliance assistance was provided by supplying a fact sheet and explaining the open burning regulation.								
KCRO	5/15/2023	5/9/2023	Karen Alexander	Kansas City Jackson	Open Burning	DS

Concerns Investigated Between
April 16, 2023 and June 15, 2023

Note: "Concern Info" refers to the information provided to the department by the concerned party. The information seeks to accurately reflect the nature of the allegations as it was made. Those statements of allegations do not necessarily reflect the legal

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
Concern No. 53436 Concern Info Concerned party (CP) left a voicemail the evening of May 5, 2023. CP states the burning is still bad. Reports that when they got home last night (May 4), the smell was very strong.								
Comments Only minimal incidental fencing, which was entangled with some onsite vegetation that was burned, was observed on site. Compliance assistance was provided by explaining the open burning regulations and providing factsheets.								
KCRO	5/11/2023	5/9/2023	Asas Brother Farms (SP?)	Buchanan	Odor	GE		
Concern No. 53443 Concern Info A farmer is using a fertilizer on his field that supposedly includes chicken carcasses. The fertilizer is currently in large piles on the fields. According to the CP this is incredibly bad smelling from rotting meat.								
Comments I do not think that the compost piles are a concern for the creek. The odor is exempt due to agriculture use.								
KCRO	5/19/2023	5/12/2023	Sealmaster	Kansas City Jackson	Odor	MC		

Monthly Air Pollution Control Program Detail Report

Concerns Investigated Between April 16, 2023 and June 15, 2023

Note: "Concern Info" refers to the information provided to the department by the concerned party. The information seeks to accurately reflect the nature of the allegation as it was made. Those statements of allegations do not necessarily reflect the legal

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
Concern No.	53435	Concern Info	Paul Glaser stated that Steelmaster has exhausts coming from their facility that appear to be harmful and causing his family discomfort. He said it is unpleasant for them to sit and in their backyard. He stated he currently has his window up to get some fresh air and the smell is all through his house. Paul also stated that he has spoken with the City of Kansas City about the issue and was told that they do not have any laws that address this issue. He shared that shortly after his conversation with the City of Kansas City, Steelmaster installed some system that had a longer smokestack but it did not stop the odor and they disassembled it after a month. He said he has called the EPA to report the issue and they told him the State of Missouri should be contacted. Someone with the EPA allegedly told him that the company was registered to emit anything into the air. Mr. Glaser stated he has contacted the State of Missouri and had not heard anything from them. There was a concern in April 2023; ACECON53077, that was is archived in Sharepoint.					
Comments	This concern is located within the city limits of Kansas City, MO; therefore, the concern was referred to the delegated local agency, which is the City of Kansas City Health Department's Air Quality Program (KCAQ).							
KCAQ responded on May 23, 2023, and reported not smelling any odor. KCAQ also inquired about the best time to investigate.								
On May 25, 2023, I emailed the CP, who responded that the smell was worst when SealMaster is mixing asphalt, which is usually in the morning. I passed this information on to KCAQ.

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
Concern No. 53466 Concern Info Concerned party worried about a junkyard that has shown up in town located at 107 North Depot Street, Calhoun, MO. Caller stated that the yard has scrapped junk cars everywhere, and that the people who live there are burning materials on site. Caller was concerned about vehicle fluids as well.								
Comments Compliance assistance provided, no further action at this time.								
KCRO	5/25/2023	5/16/2023	Reuben Neville	Gentry	Open Burning	DS		
Concern No. 53532 Concern Info Caller stated that Owner (Rueben) has dump truck full of waste that they are burning (poop, mattresses and other things). Didn't know the address but the residence has a camper sitting on it. The air quality is poor.								
Comments Some evidence of burning was observed, but it could not be determined when the burning occurred. The responsible party stated the burning occurred prior to his purchase of the property. Compliance assistance was provided by explaining the open burning and waste management regulations. Responsible party was advised to keep landfill receipts.

Note: "Concern Info" refers to the information provided to the department by the concerned party. The information seeks to accurately reflect the nature of the allegation as it was made. Those statements of allegations do not necessarily reflect the legal

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
Concern No. 53534 Concern Info CP called about a strong asphalt smell and emissions from an asphalt plant, especially in the morning and is afraid that it could make his kids sick. They smell the odor inside their home and the adults have headaches. He said that some of the machinery displays ldeker. He would like a follow-up call.								
Comments This concern is located within the city limits of Kansas City, MO; therefore, the concern was referred to the delegated local agency, which is the City of Kansas City Health Department's Air Quality Program (KCAQ).								
KCAQ responded on May 22, 2023: This ldeker plant was issued a stop work order by city planning last week. I went out there Thursday (May 18, 2023) and they were still not operating, I discussed the concern with one of the operators who said he will inform the plant manager.								
KCRO	5/25/2023	5/24/2023	24/7 Enviro Solutions	Independence Jackson	Asbestos Transfer Station	JS		
Concern No. 53605 Concern Info The caller stated that the address provided had a large dumpster with plastic bags that are both inside and outside the dumpster walls that have split open. The bags are labeled "asbestos". This incident is being referred to the Department's Kansas City Regional Office for further investigation.								
Comments Only non-regulated asbestos materials were observed. 24/7 plans to have these materials placed into an on-site dumpster for later roper disposal at a landfill. No violations of asbestos air regulations were observed during the investigation.

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
Concern No. 53637 Concern Info CP reports that the Livestock Exchange Building is being demolished and wanted to know if Contracting company had submitted correct paperwork. A demolition notification was found for building, with demolition start date of June 1, 2023. CP drove by property and found that demolition had already started and noted no hoses for wet demolition, and there was a lot of dust being created. CP very concerned about OSHA violations observed, no helmets, no safety gear (PPE) etc.								
Comments A Letter of Warning has been issued to Madget Demolition and Albaugh, LLC, for beginning demolition prior to the notified start date and failing to keep the demolition and demolition waste adequately wet.								
KCRO	6/5/2023	5/30/2023	David Finke	Camden Point Platte	Open Dumps Open Burning	KB		
Concern No. 53640 Concern Info She was calling to see why there hasn't been anything done about a house behind her that is "running a legit trash business with dumpsters on his property and burning the trash, and is currently burying all of the trash." She said her husband has called twice and that the responsible party lied to DNR and said that it is just residential waste, but that she sees trucks full of trash go to the house and dump garbage on the property. She says that she has well water and is concerned about drinking water contamination. She said Platte County has issued a cease and assist effective tomorrow (5/31/23). She would like to speak with an investigator because she wants the investigation reopened and believes that there needs to be another site visit.								
Comments No violations of the Missouri Solid Waste Law were observed.

Comments								
KCRO		5/31/2023	Spencer Moore	Kingsville Johnson	Open Burning Open Dumps	CK		
Concern No. 53662 Concern Info I'm getting in touch with you regarding several railroad ties that have been burning that was buried in a pile of dirt. Johnson County Fire District #2 responded, attempted to put the fire out, unsuccessful doing so. Johnson County Sheriff Department did a report. So did the fire department. From what I understand the owner of the property was advised to cover them up with dirt. The date of the fire was on 3/2/2023.								
Comments								
KCRO	6/6/2023	6/6/2023	Unknown	Rich Hill Bates	Asbestos Open Dumps Stormwater Contamination	CK		
Concern No. 53773 Concern Info Anonymous caller reported he overheard individuals commenting on the demolition of a building in Rich Hill, and that the waste was being dumped somewhere close to a creek. The individuals also discussed if there was asbestos in any of the old material, such as pipe insulation or in the plaster. The caller said he did not hear the name or address of the store, or which creek the debris was being dumped near.

Concern No. 53780 Concern Info Custom Shutters by Doyle, LLC is operating with an illegal paint booth and exhausting the fumes and potentially other materials to the outside without any filtration or proper remediation. There is a natural stream within 200ft of this warehouse and wildlife nearby. This is occurring in their 3 bay warehouse in Parkville this is done directly by the owner Paul Doyle.								
Comments In conclusion no violations were found during the inspection.								
KCRO		6/12/2023	Oasis Mobile Home Park	Belton Cass	Particulates			
Concern No. 53785 Concern Info Air concern- White dust in air when there's no wind. He says he wears a gas mask to get to his car. He was freaking out and rinsed his mouth out from the white dust. He's worried about the health impact. Says he can see the particles in the air, isn't sure if its from insulation. He thinks it might be insulation from the nearby mobile homes being torn down. I asked him what it smelled like and he said sewage. He says its causing him to cough. (He had a lot of concerns about the package plant near by and I have entered a separate concern for that).

Concern No.	53346	Concern Info	Webform email states: "Mark Lajeunesse owns two homes at 843 and 841 West Coates. Both homes are condemned and unlivable. He dug a large hole next to the home at 843 and is demolishing the homes and disposing of the material in this hole he dug. These homes contain asbestos in the material used to build them. Every time the wind blows the insulation and trash is blown all over neighboring properties. Im concerned the impact this improper burying of material is going to have on our environment, as well as concerned for the safety of the children in the neighborhood playing with this demolished asbestos containing material blowing all over the place."

Concern No.	53810	Concern Info	We received a call on 06/09/2023 concerning smoke and white ash coming from the site of a new solar farm. On 06/15/2023 we arrived at the solar farm and met with Scott Grant. Scott Grant is the construction manager for Dashiell construction company. Scott was at the site to oversee concrete work. He explained to us that they were not burning anything and showed us the dumpster they were using for any waste. While talking with Scott, Greyden Searcy (security guard) approached us and asked why we were on the site. We explained the concern we were investigating, and he told us of two different areas where Elight Electric Services had burned vegetation. We investigated both burn sites and saw no debris or sources of concern at either site. On 06/20/23 I spoke with Dustin Land. Dustin is the superintendent at E Light Electric Services. After explaining there had been a call of concern and the investigation that had taken place, he explained they had two different areas they had burned vegetation but had contacted the Audrain fire department prior to the burning and had gone through the appropriate steps for the burn.					
Comments	No violations were found during this investigation. Information letter will be provided.

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
Concern No. 53179 Concern Info Dust and gravel in front of CP's house with Big Trucks going back and forth to the MFA to get chemicals for the farmers fields. They used to water the road to keep the dust down, but now do not and it is awful.								
Comments I began my surveillance of MFA Agri Services in Bernie at 9:50 a.m. and ended at 10:50 a.m. The weather was partly cloudy with a temperature of 64 degrees Fahrenheit. The wind was from the Southwest at 8 miles per hour with gusts of up to 25 miles per hour. The relative humidity was 51%. I observed that there was some dust from the unpaved areas of MFA Agri Services because of trucks that were entering and leaving the parking lot. However, these fugitive particulate matter emissions did not appear to be leaving the property. After I made fugitive particulate matter observations from on site, I spoke with Brad Lancaster, Manager of MFA Agri Services in Bernie. Brad Lancaster stated that a 1,000 gallon water trailer is used in the fall to keep down dust emissions at MFA Agri Services. The trailer is a shop made watering trailer with a pvc pipe as applicator. I requested that Brad Lancaster begin using the trailer because, in my opinion, on windier days there was the potential for a violation at this location. Brad Lancaster did seem willing to begin applying water right away as per my request. Brad Lancaster stated that he had been dealing with the neighbor who has had past dust concerns and that the neighbor did not say anything recently. Brad Lancaster is especially concerned about dust emissions issues this summer because water application is not always as effective in the summer heat. I mentioned that magnesium chloride is a chemical dust suppressant in use on haul roads at some quarries in Southeast Missouri. Brad Lancaster stated that the chemical dust suppressant will be researched for use at MFA Agri Services for this summer. I left Brad Lancaster my business card, a copy of the regulation Missouri Air Conservation Regulation 10 Code of State Regulations 10-6.170 Restriction of Particulate Matter to the Ambient Air Beyond the Premises of Origin, and a copy of the fact sheet Dust Suppression on Unpaved Roads. I thanked Brad Lancaster for the time and the assistance with my investigation.								
No violation of Missouri Air Conservation 10 Code of State Regulations 10-6.170 Restriction of Particulate Matter to the Ambient Air Beyond the Premises of Origin was observed.

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
Concern No. 53320 Concern Info Burning tires.								
Comments Upon receiving the concern, it was disclosed to the concerned party that Star Storage had a burning permit. Todd Raney, Air Program Supervisor, contacted the City of Leadington and spoke with Sergeant Andrew Lewis, Leadington Police, and discussed open burning requirements. Sergeant Lewis Stated that the responsible party had open burned some furniture and they had told him to stop the burning. Sergeant Lewis also stated that the City of Leadington does not issue burning permits.								
On April 18, 2023, I drove by the site and did not observe any open burning. The location is fenced in but there was a phone number for the site.								
On April 27, 2023, I reached out to Star Storage and spoke with Gerald Grubbs. He acknowledged that he does burn brush and had done furniture in the past, but no tires. He did acknowledge that one tv had fallen into the burn area but he knows better than to burn tvs. We discussed open burning requirements and I told him that any durable goods, including furniture and tvs are to not be burned. I also informed him that he needs to make sure he meets distance requirements if he is to burn brush. He requested a copy of the open burn fact sheet which is being provided.								
It has been advised to Gerald Grubbs to discontinue any burning that goes against the Open Burning Regulation. A fact sheet is being provided to him so that he is aware of what he can and can not do.

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
Concern No. 53309 Concern Info CP states the rock quarry is causing a wave after wave of dust and it is covering his house & vehicles. They are not making any efforts to water it down or try to control it								
Comments I investigated this environmental concern from 11:46 a.m. to 12:46 p.m. The weather was partly cloudy with a temperature of 64 degrees Fahrenheit. The wind was out of the East at 9 miles per hour with gusts up to 13 miles per hour. The humidity relative to the temperature was 41 percent. I did not note any dust leaving the quarry property. Next, I drove on to Capital Quarry's property. I spoke with Larry Bock, Supervisor for Capital Quarries. Larry Bock pointed out that the haul roads on site had been recently watered and that the required watering log is being kept (in the watering truck) as required in the air construction permit for the facility (see Attachment AA Best Management Practices air construction permit number 082005-007E). We discussed that both Phelps County Road 2110 near the quarry entrance and Highway 63 near the quarry entrance were not under Capital Quarry's control but did appear to be dusty at the time of my investigation. I telephoned Chris Thiltgen, Environmental Compliance Manager with Capital Quarries, on April 28, 2023 in regard to this environmental concern. Chris Thiltgen stated the Missouri Department of Transportation's Maintenance Office at Rolla would be contacted to see if they would assist in keeping the area of Highway 63 near the Capital Quarries entrance cleaner. Chris Thiltgen explained that Capital Quarries had been supplying base rock for a big road job and this had resulted in quite a bit of truck traffic at the time this environmental concern was received. No violation of Missouri Air Conservation Regulation 10 Code of State Regulations 10-6.170 Restriction of Particulate Matter in the Ambient Air Beyond the Premises of Origin was observed.

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
Concern No. 53470 Concern Info It is believed that Vonallmen Processing has taken several loads of beef hides and buried them behind on the west border of the property. The odor is very strong and there is concern of groundwater being contaminated.								
Comments On April 26, 2023, I arrived at the site unannounced in order to determine if Vonallmen Processing was in violation of Missouri Solid Waste Regulations for improper disposal of solid waste. When I arrived at the site, I spoke with Josh Garrison (Garrison) and explained why I was there. When asked about the improper disposal of solid waste, Garrison stated that he had buried some beef hides on the west boundary of the property. Garrison then showed me the buried waste and we discussed proper disposal options. He stated that he would remove the waste and transport it to West Plains Transfer Station. He also acknowledged that he conducted small amounts of open burning on the property to get rid of plastics and papers. I informed him to cease the activity and, if needed, acquire a waste bin for proper disposal. Vonallmen Processing was issued a Letter of Unsatisfactory Findings for the violations noted. Please refer to the report for full details. Vonallmen Processing was in violation of Missouri Air Conservation Regulation and Missouri Solid Waste Management Law and Regulation for open burning and improper disposal of solid waste. Vonallmen Processing was issued a Letter of Unsatisfactory Findings for the violations noted. Please refer to the report for full details.

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
Concern No. 53317 Concern Info Neighbor across Hwy. 160 burns copper to recover the copper and sell it to scrap yard. his name is Jonathan Hart. The house is rented by his girlfriend Hope Kirchner and is surrounded by Mark Twain National Forest. Mr. Jones has posted videos to YouTube, See "Johnathan Hart Pollutes the National Forest" on YouTube.								
Comments I arrived at 18574 Highway 160 East, Doniphan, MO 63935 around 3:00 p.m. There was no active burning occurring at the property. I approached the residence to attempt to make contact, but no one responded. I provided a business card and "Facts on Open Burning under Missouri Regulations - PUB 2045." I viewed the property from the driveway and did see multiple burn piles, but there was no obvious evidence of a salvage operation. Based on the observations made during the investigation, it was not possible to determine when the burning of these piles occurred.?								
This situation is worth further investigation if concerns are submitted.

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
Concern No. 53319 Concern Info CP states The smell from the BFC Compost on Hwy T smells so bad that we had to close our windows and go inside instead of enjoying an evening on the patio.								
Comments I arrived at the location around 11:15 a.m. on May 1, 2023. At the time of the investigations the facility was not operating. I parked my vehicle at Westgate Storage near the origin of the odor. There was an odor in the air although it was not particularly strong. I made observations for around 45 minutes making readings with the nasal ranger every 5-8 minutes as the wind direction changed. There was no detectable odor through the nasal ranger. I drove Parkers Lake Drive and East Lake Drive since that is the area that the concerned party resides. At the time of the inspection there was no odor detected in that area. I attempted to make contact with BFC Composting office staff, but when I made my attempt no one responded at the office. There is an odor emitted from this facility, but on this investigation not strong enough for a violation. On May 2, 2023 I spoke via phone to Anna Berkbuegler who is the owner of the facility, she confirmed that there were no out of the ordinary operations that occurred around the time of the concern. Anna explained that the facility combines butcher waste and sawdust for the composting process and the odor may be more abundant when the material is turned over or mixed. This facility has operated here since 2001.								
Weather conditions: 60 degrees and a NW wind at 17 mph.								
If this concern need to be investigated again please note that the road conditions on East Lake Drive are not very well maintained and East Lake Drive is also very rocky in some areas with fairly severe erosion.								
No Violations Noted on this Investigation

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
Concern No. 53318 Concern Info CP states The property owners next to me are burning tires. The smoke is awful. I notified the local sheriffs department and they said I had to contact your department								
Comments At the time of my investigation, there was no apparent evidence of a tire fire. It was apparent that open burning of trash including aerosol cans had occurred. Tabatha Jones state that there had been a shed in the backyard that had accidentally burned four to five years ago and that some of the waste was produced by that fire. Tabatha Jones further stated that she has been having difficulty getting a dumpster delivered to help with the waste issues, Tabatha Jones believed that a neighbor had been upset when a recent fire had created too much black smoke. They had not realized how much plastic and other residential waste material was on fire until the black smoke was going everywhere. They had put out the fire with a garden hose, but the neighbor had called anyway. I discussed with Tabatha Jones that tires are prohibited from being open burned for disposal by regulation. I left Tabatha Jones my business card, a copy of the regulation Missouri Air Conservation Regulation 10 Code of State Regulations 10-6.045 Open Burning Requirements and a copy of the fact sheet Facts on Open Burning Under Missouri Regulations. No violation of Missouri Air Conservation Regulation 10 Code of State Regulations 10-6.045 Open Burning Requirements was observed.

<p>Concern No. 53407 Concern Info This concern came in via the web. This was copied from the email: My neighbors are burning tires. The date of incident is April 26, 2023. I contacted the local sheriff's dept and they said I needed to contact your department. The address of property in question is 3233 County Highway 524 Caruthersville, MO 63830. Property owner is Tabatha McCaig or may go by Tabatha Jones. The email has been uploaded as a PDF due to the pictures.</p> <p>Comments Submitted by Josh Wilkerson.</p> <p>Todd Raney conducted the investigation on April 27, 2016. His findings are listed below.</p> <p>At the time of my investigation, there was no apparent evidence of a tire fire. It was apparent that open burning of trash including aerosol cans had occurred. Tabatha Jones state that there had been a shed in the backyard that had accidentally burned four to five years ago and that some of the waste was produced by that fire. Tabatha Jones further stated that she has been having difficulty getting a dumpster delivered to help with the waste issues, Tabatha Jones believed that a neighbor had been upset when a recent fire had created too much black smoke. They had not realized how much plastic and other residential waste material was on fire until the black smoke was going everywhere. They had put out the fire with a garden hose, but the neighbor had called anyway.</p> <p>I discussed with Tabatha Jones that tires are prohibited from being open burned for disposal by regulation. I left Tabatha Jones my business card, a copy of the regulation Missouri Air Conservation Regulation 10 Code of State Regulations 10-6.045 Open Burning Requirements and a copy of the fact sheet Facts on Open Burning Under Missouri Regulations.</p> <p>No violation of Missouri Air Conservation Regulation 10 Code of State Regulations 10-6.045 Open Burning Requirements was observed. Discussion of proper management of waste occurred.</p>

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
Concern No. 53412 Concern Info The National Response Center report states: "The caller discovered a black smoke cloud in the vicinity of the plant. The caller states this happens every night. The pollution is causing persons to cough and have trouble breathing."								
Comments At the time of my investigation, operations appeared normal for Magnitude 7 Metals. I did not observe any black emissions. I travelled to the area near the facility and observed daylight facility activity from 3:03 p.m. to 3:05 p.m. and again I also made observations from 7:03 p.m. until 8:20 p.m. I began by checking the St. Jude Industrial Park for the black cloud. After dark I also looked for the glow of fires that along with the air pollution sources in the St. Jude Industrial Park could also be responsible for a black cloud of smoke. No fires were noted. When it was dark, I rolled down the windows of the vehicle and monitored for any affect to my breathing both while parked in and driving through the St. Jude Industrial Park and as I slowly drove through Marston. Nothing of note was observed or experienced. No black smoke cloud was noted and no breathing problems were experienced. On May 1, 2023 I telephoned Art Nispel, Director of Environmental and Health with Magnitude 7 Metals and Alicia Powell, Environmental Superintendent with Magnitude 7 Metals. They both stated that there had not been any upset or malfunction conditions at Magnitude 7 Metals during the time period when this environmental concern had been received. However, stack testing (for POM - polycyclic organic matter) was being conducted at Magnitude 7 Metals on April 25, April 26, and April 27, 2023. No violations of federal or state air pollution regulations were observed.

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
Concern No. 53422 Concern Info The caller states that while doing HVAC at a private residence refrigerant was released into the atmosphere. The cause of the release was attributed to an operator error by the caller after the mobile home was moved. The amount of material that released is unknown to the caller. The caller stated that no action has been taken								
Comments Derek Lawrence is a mobile home mover. When he arrived on site the air conditioning unit was unhooked and the refrigerant was removed. The property was a rental property evicting the renter. The renter had refused to move. Derek Lawrence refused to move the unit and the renter informed him she would call "everyone" to get him in trouble.								
Unknown if a release occurred. No violation observed.

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
Concern No.	53441	Concern Info	CP states neighbors are burning all types of trash like mattresses etc. CP states RP's basement flooded and the items being burned are covered in mold. CP states there may be a tire or two as well.					
Comments	<p>At the time of this investigation, I did not observe any open burning taking place. There was a small open burn pile with a water house stationed next to it and several burn barrels located on the property. The Responsible Party, Cheri Goldsmith, stated that there had been some flooding in the basement of the home that necessitated open burning of some wood pallet wastes. Cheri Goldsmith further stated that open burning of household trash had also occurred recently (on the burn pile I observed) and since 2005 at this property. There were also some barrels around stumps that Cheri Goldsmith was trying to burn up by burning the pallet waste in the barrels. Additionally, Cheri Goldsmith stated that the next door neighbor had been difficult to get along with and that there is an ongoing neighbor squabble between them.</p> <p>I thanked Cheri Goldsmith and left my business card, the Missouri Conservation Regulation 10 Code of State Regulations 10-6.045 Open Burning Requirements, the fact sheet Facts on Open Burning Under Missouri Regulations, the fact sheet Managing Construction and Demolition Waste, and the fact sheet Management of Scrap Tires. I asked Cheri Goldsmith to please call if there were any questions in regards to these documents or about open burning in general.</p> <p>No violation of Missouri Air Conservation Regulation 10 Code of State Regulations 10-6.045 Open Burning Requirements was observed. The open burning of household trash and untreated wood wastes is not a prohibited activity when the burning takes place on the residential premises where the waste was generated and as in this case, the property is occupied by only a single residential unit.?</p>

--------	--------------------	---------------	---------------------------------	-------------	-----------------	--------------------	-----	------

Concern No. 53492 **Concern Info** CP states a contractor is doing demo on a house and demolished it into the basement. He is now burning it.

Comments I arrived at the corner of County Road 324 & Hwy 25 in between Jackson and Gordonville around 4:00 p.m. on May 15, 2023. I viewed the property from the roads that surround it looking for any clear signs of burning. I was unable to determine if any burning had been done from the vehicle. I then parked the vehicle on the gravel lot on the property and took photos of the disturbed soil and surrounding area. I met with a truck driver, who did not disclose their name, the driver provided me the phone number of the property owner, Rocky Strand whom I was unable to reach by phone. The truck driver stated that the demolition material was compacted in the basement of the house then loaded into trucks and brought to the Jackson Transfer Station. According to David Hutchinson of Progressive Waste Solutions in Jackson, Mark Strand Construction did bring 4 to 5 dump truck loads of demolition waste totaling to ten tons this information was gathered by telephone on May 16, 2023.?

No Violations of Missouri Air Conservation Regulation 10 Code of State Regulations 10-6.045 Open Burning Requirements were noted during this investigation.

SERO	5/18/2023	5/12/2023	Caleb Roseman	Kewanee New Madrid	Open Burning	TR
------	-----------	-----------	---------------	-----------------------	--------------	----

Concern No. 53530 **Concern Info** CP states neighbor has been burning copper wire for about a month now. The smell is awful. Sewer is also being dumped the ground

Comments At the time of this investigation, no open burning was occurring. The Responsible Party stated that only trash had been open burned including boxes and other rubbish. Caleb Roseman stated that the street address has not been finalized for this location, which is going to be a residence once construction is finished. I gave Caleb Roseman my business card, a copy of the Missouri Air Conservation Regulation 10 Code of State Regulations 10-6.045 Open Burning Requirements, the fact sheet Facts on Open Burning Under Missouri Regulations, and the fact sheet Managing Construction and Demolition Waste. This interview was cut short when Caleb Roseman asked me to leave the property. Caleb Roseman abruptly expressed anger at the neighbor at 34 First Street, Kewanee when I told him that the concern involved burning insulation off of copper wire, which is a prohibited activity. Next, Caleb Roseman asked me to leave the property and I then left the area.?

No violation of Missouri Air Conservation Regulation 10 Code of State Regulations 10-6.045 Open burning Requirements was observed.

SERO	5/19/2023	5/18/2023	BFC Composting	Perryville Perry	Odor	JE		

Concern No. 53664 **Concern Info** The CP reports that strong odors (putrid) have been detected at the CPs residence and surrounding area of BFC Composting. The last two days, the odor has been detected in the afternoon and evening. No set time has been identified for the odors.

Comments On May 19, 2023, I visited the address of the concerned party while being accompanied by Wyatt Yarbrough, Department Intern. Due to the recent odor concerns in the area I met with Joyce Jackson, concerned party, to discuss how the odor regulation works and how we determine compliance with the odor regulation. We discussed dilution thresholds and how an odor is assessed with the Nasal Ranger. There was other solid waste on site, but BFC Composting has a unique odor that was identified on the property. While on site, I used the Nasal Ranger but did not detect anything above 2:1 dilution threshold, whereas to be in violation of the odor regulation, the odor must exceed a 7:1 dilution threshold. During the discussion, I did request that Joyce log information when she detects the odor such as date, time, weather conditions, and strength of the odor. This could maybe help identify if certain operations at the site cause the odor to be more prominent.

After the initial discussion and how the nasal ranger works, Joyce mentioned that the creek area typically emits the same odor, especially when dirt is overturned near the culvert. I informed her that we likely could not use that as a violation of the odor regulation, but that I would log the information.

On May 30, 2023, I contacted Anna, Owner of BFC Composting. We discussed current operations and what she needs to submit to the WMP in order to update her plan of operations for the site. The information should be submitted by June 2, 2023.
At the time of the concern investigation, there was no violation of the odor regulations.

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
Comments Robertson Drago and Sons received a "disaster pack" for direct cremation.								
Disaster packs are large, heavy, thick plastic body bags manufactured to contain bodies, body parts, and fluids. These bags weigh approximately 10 pounds each. They are utilized when it is necessary to contain body parts and fluids to prevent contamination and loss of the body parts and fluids.								
Because of the potential contamination issue or loss of body parts and fluids, these packs contents are not removed from the bag prior to cremation. Cremations can contain ten percent or less of plastic weight per year of total cremation weight. These calculations are verified during routine inspections.								
Robertson Drago and Sons received the disaster pack and was requested to hold the pack for three days prior to cremation until the investigation was complete. Upon release, Robertson Drago and Sons cremated the disaster pack. Because the pack is manufactured from plastic some smoke can be observed upon first starting the cremation process. Robertson Drago and Sons observed less than five minutes of excess emissions occurring following the start up.								
Robertson Drago and Sons has scheduled the routine yearly inspection with the manufacturer of the cremation unit. Matthews Environmental Solutions is scheduled for yearly testing and training at Robertson Drago and Sons. The current service agreement was provided to the Department.								
Nathan Evans inquired about opacity observation training for his staff. He is planning to have staff attend the next round of opacity observation training or Smoke School.								
Robertson Drago and Sons has agreed to notify the Department prior to cremating a disaster pack in the future. If during the cremation process they observe excess emission, they will report to the Department as required. Robertson Drago and Sons is also planning to notify the Department when the next routine cremation is occurring so that Department staff can be present to observe the unit in operation.								
Observations made of the chart recorder record during the unannounced investigation indicated that the cremation was normal and did not indicate any irregular occurrences.								
The interior of the cremation unit was in good repair and I did not observed any large cracks or breaks. The stack did not have obvious excessive buildup.

--------	-----------------------	------------------	------------------------------------	-------------	-----------------	-----------------------	-----	------

Comments Hayden Cassinger:

I arrived on site on May 30, 2023 at 1:15 p.m. The weather conditions at time of inspection were 86° Fahrenheit with 37 percent humidity and an east south east wind at 5 miles per hour with a clear sky and sparse clouds. I began my investigation by sitting in the vehicle near the front entrance (37.785638, -89.931916). This location allowed for a view of the storage pile nearest to the road and the conveying system leading to the storage bins for truck load out. I sat at this location for thirty minutes and did not see any fugitive particulate matter at or near the property boundary. During this investigation, the facility was not operating at a high capacity. There were no violations noted during this portion of the investigation.

After observing at this location I moved to Hoff Bros. LP and gas Company (37.788166, -89.929474) where I also sat for thirty minutes. This viewing location allowed me to see the upper portion of the conveying system into the storage bins. There were no violations noted during this portion of the investigation.

Around 2:20 p.m. I approached the facility and met with Craig Kellmann, Controller and Jazz Coffman, Safety and Health Manager. We discussed the recent activities of the facility and how the facility plans on operating in the future. Representatives stated the facility opened in April of 2023 and are currently only drying sand that is on site to ship by truck. The facility is not crushing or producing anymore sand at this time, only drying the sand that is already on site. This facility has a tentative plan to be at full production around fall of 2023.

Once the facility reaches full production, the facility will add wet sand to storage piles which will decrease the potential for fugitive dust. Representatives state the facility could possibly load 100 trucks per day. Representatives stated they had been in contact with the Concerned Party (CP) the week prior to the investigation. The CP has been at this location for approximately two years and this could possibly be the first time the CP has seen this facility operate.

Todd Raney:

I arrived at the site at approximately 11:25 a.m. on June 2, 2023. The weather conditions were partly sunny with a temperature 85 degrees Fahrenheit. The wind was from the ENE at 5 miles per hour with gusts to 11 miles per hour. The humidity relative to the temperature was 52 percent. I drove around the perimeter to check for any visible fugitive particulate matter (dust) emissions. I then proceeded back to a position where I could watch the plant's main entrance for truck traffic and other sources of fugitive particulate matter. I was parked at this first position facing east along the shoulder of State Highway M from 11:28 a.m. to 12:00 p.m. observing the facility. I then did another perimeter check and I relocated to a position where I was viewing the

plant's main entrance while facing west on the shoulder of State Highway M. I was at this location from 12:03 p.m. to 12:33 p.m. I did not note any fugitive dust crossing property lines during these observations.								
SERO	5/30/2023	5/30/2023	Mann's Fish Market	Caruthersville Pemiscot	Odor	JW		

Concern No. 53679 **Concern Info** This concern has a received date of Sept 6, 2017 7:20 am. It was received by the St. Louis Regional Office via an odor reporting log. SERO received this concern today, May 30, 2023. The smell from a fish market nearby has been ongoing for years. The smell is so strong now that it causes locals to gag from the smell. Makes locals nauseous. Cannot come outside from the foul smell.

Comments On May 30, 2023, the Southeast Regional Office received the referenced concern. The concern was originally received by the St. Louis Regional Office online I-70/I-270 Area Online Odor Concern form on September 6, 2017. The concern was not forwarded at the time of receipt.

On May 31, 2023, I drove by the reported location (Mann's Fish Market), though I am unsure if this is the same business that was referenced as a fish market at the time of the original concern. I drove along E. 20th Street and E. 7th street with no detectable odors. The wind was calm during the investigation. I staged on E. 20th adjacent to the fish market for 15 minutes. No odors were detected.

No odor concerns were detected during the investigation.

Due to the historical nature of the concern received, the Department will wait on any further notifications for further investigation.

Note: "Concern Info" refers to the information provided to the department by the concerned party. The information seeks to accurately reflect the nature of the allegation as it was made. Those statements of allegations do not necessarily reflect the legal

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
Concern No. 53731	Concern Info I am sure you have received complaints about the obnoxious stinch coming from their sewer treatment plant before. Its beyond bad. Ive heard folklore that they will sometimes release raw sewage straight into big river, unfiltered. They just need to spend the revenue to fix and run their treatment plant property. It will seriously make a person sick to their stomach driving past it. I don't live there but I have to drive by it everyday for work. What can be done?							
Comments	<p>I began this investigation at 10:32 a.m. The weather was sunny and the temperature was 81 degrees Fahrenheit. The wind was from the southeast at four (4) miles per hour with gusts up to 10 miles per hour. Odor surveillance began and ended on Highway 8 near Leadwood; but because of the wind direction, the surveillance also encompassed the area around Leadwood to the North of Highway 8. Observations ended at 11:55 a.m. when the weather was sunny and the temperature was 83 degrees Fahrenheit. The wind was from the southeast at five (5) miles per hour with gusts up to 12 miles per hour. Odors observed included cut grass, vegetation, wood smoke and a dead skunk along Highway 8. No sewer or sewer-like odors were noted.</p> <p>After the investigation, I telephoned Leadwood City Hall and was given the telephone number for Kevin Brooks, Chief Water Operator. Chief Brooks stated that around the time of the receipt of this odor environmental concern the holding tank had been decanted and a sludge hauler had removed and hauled away sludge. During the time this activity was taking place the blowers were turned off. When the blowers were turned back on there was an odor for a few hours. The holding tank is approximately 50 yards from Highway 8. Otherwise, operations at the wastewater treatment plant had been normal.</p> <p>No violation of Missouri Air Conservation Regulation 10 Code of State Regulation Restriction of Emission of Odors was observed.</p>

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
<p>Concern No. 53708 Concern Info John Frey with EPA writes: EER Folks, I received a call on our EPA Spill Line from a resident in Van Buren, MO. He reported that his neighbor is replacing his asphalt shingled roof and instead of disposing of it properly, he is burning it on his property which is creating black smoke that is impacting CP and other nearby residence. The citizen's name (CP) is Gene Deffendall and his cell number is (573) 870-0249. The resident who is conducting the burning lives at 116 E. Pine, Van Buren, MO.</p> <p>Comments I arrived at the RP's address at approximately 3:00 PM on June 1, 2023. From East Pine Street, I was able to see a dark debris pile smoldering at the corner of the property. I pulled to the side of East Pine Street and took a few photographs from my vehicle of the smoldering pile. After taking some photos, I went to the front door of the home located at 116 East Pine Street. I was greeted by Dave McVay and presented my credentials to him. I explained to Dave that we had received a concern about someone burning asphalt shingles at this address and asked Dave if he was aware of anything. Dave then took me around the house to the smoldering pile.</p> <p>Dave explained to me that he burns his household waste regularly at the corner of his property. He is also resurfacing his roof and had already removed some shingles and placed them in a pile right behind the household waste pile. Dave told me that he set his household waste on fire earlier in the day and then left to go to Poplar Bluff for roofing supplies. He can only assume that while he was gone, the fire spread from the household waste pile to the shingles pile just behind it. As Dave was explaining this all to me, he pulled a hose over from the house and began saturating the smoldering shingles pile to try and extinguish it. Only about a quarter of the shingles pile had actually been burned; the rest of the pile was untouched by fire.</p> <p>I told Dave that the unburned shingles need to be moved somewhere far away from his household waste pile and similarly, all other shingles removed from his house need to be stored far away from any burn piles. I also told Dave that asphalt shingles should never be open burned and that for safety reasons, he should never start a fire and leave the area without extinguishing it first. I gave Dave a copy of PUB2047 - Facts on Open Burning Under Missouri Regulations and Missouri Air Conservation Regulation 10 Code of State Regulations 10-6.045 Open Burning Requirements, as well as my business card. I encouraged Dave to contact me if he ever had any open burning questions. I then left the property.</p>

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
Concern No. 53732 Concern Info Green, acrid smoke coming from plant								
Comments I began my investigation of this environmental concern at 3:10 p.m.. I left the area at 4:14 p.m. The weather was partly cloudy with a temperature of 91 degrees Fahrenheit. The wind was out of the east, northeast at eight (8) miles per hour with gusts up to 14 miles per hour. I did not observe any fugitive emissions or any visible green emissions. The emissions appeared normal for Magnitude 7 Metals. Since Magnitude 7 Metals is an older plant it is allowed emissions of up to 40 percent opacity. Normal visible emissions at Magnitude 7 Metals include shades of white and black colors. However, when the sun is variable due to cloud cover, it is possible that visible emissions might appear to change color slightly. On June 5, 2023, I telephoned Art Nispel, Director of Environmental and Health with Magnitude 7 Metals. Art Nispel stated that there had been some problems recently with carbon bake scrubbers that produced some emissions. These problems have been addressed. However, the carbon bake scrubber visible emissions are not green in color according to Art Nispel. Additionally, Magnitude 7 Metals conducts weekly United States Environmental Protection Agency Method 22 tests for visible emissions from equipment operating at the plant. This helps Magnitude 7 Metals to become aware of any visible emission exceedances. No violation of Missouri Air Conservation Regulation 10 Code of State Regulations 10-6.220 Restriction of Emission of Visible Air Contaminants was observed.

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
Concern No. 53902 Concern Info Delta Peanut - construction without an construction permit, operating without an operating permit. My family has filed previous complaints and concerns and no actions have been taken. I guess it's ok to operate like the wild, wild west in Missouri?								
Comments arrived at Delta Peanut at approximately 3:15 PM on June 5, 2023. I met with John Gamble, Buying Point Manager, and presented my credentials. I explained to John that we had received a concern related to permits or the lack thereof. I had already visited this facility before, but I had John recap me on the type of equipment they have and the different processes there is. I went ahead and gave John the contact information for Ryan Reed, an environmental engineer within the Department's Permit Section in Jefferson City. John informed me that he thought that collectively, Delta Peanut, Valley View Agri-Systems, and ASM Engineering Consultants, LLC, had produced a hard copy letter exempting Delta Peanut from having to obtain an air construction permit. I told John that I would try to get ahold of Valley View and see what I could find out and maybe even get my hands on this exemption letter. After speaking with Dustin Hillis from Valley View for a few days, I was finally able to obtain this exemption letter I had been informed of. I sent this letter to Ryan Reed, MoDNR, and asked him if this letter was sufficient reason to exempt Delta Peanut from obtaining a construction permit. Ryan got back with me and said that both he and his supervisor, Chad Stephenson, had reviewed this letter and found several issues with it. Ultimately, Ryan and Chad came to the conclusion that Delta Peanut would need to apply for an air construction permit.

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
Concern No. 53771 Concern Info Received via I-70/270 Online Odor Reporting. There is a fish market a couple houses from where the smell is. They dump discards from the fish at their lot across from where you live. Its literally stinks the whole area up.								
Comments A prior investigation (Concern #5227) was conducted on May 31, 2023, with no identifiable odors at the time of investigation.								
On June 6, 2023, I left a voicemail for the Concerned Party regarding obtaining additional details. No return call was made.								
On June 9, 2023, Wyatt Yarbrough (SERO Intern) and I were driving east on E. 20th street towards Mann's Fish Market when observing a fish related odor. We continued towards the facility and turning on E. 7th street and making a loop (E. 19th, Chaffin St) back onto E. 20th Street. No odors were detected.								
We parked directly in front of the residence of 82 E. 20th street. At this location, we detected periodic odors of fish. We observed a utility trailer with five 55-gallon drums on the property across E. 20th street that is owned by John/Dorothy Mann. The drums were covered with trash bags on top that were inflated, assumed related to fish contents and decomposition gases.								
The weather conditions were: 79 F, 8mph wind out of the north, no rain, Sunny with slight cloud cover, 33% humidity, 29.90 in/Hg barometric pressure,								
I began odor monitoring via a nasal ranger at 1048 Hours. The area had a slight odor associated with fish. I conducted odor monitoring for 15 minutes until 1103 Hours. During the monitoring, I detected a 4:1 detection once. However, no 7:1 odor limits were observed, and the majority of the time the area was non-detect or occasionally 2:1 odor limits.								
We visited Mann's Fish Market and met with Byron and Rebecca Mann (Owners). I advised them of the concern, odors detected, and observed trailer. Mr. Mann advised that a refrigeration unit that is typically used to store processed fish(catfish/buffalo) for sale at the location until removed for disposal is currently inoperable. He advised it has been down for some time. He stated the drums are holding processed fish until removal. He advised that he uses Dar Pro Solutions located out of Union City, TN for removal of the processed fish, and that they take for final disposal at a renderer for catfood production. He noted they have had vehicle issues. The most recent receipt that Rebecca Mann was able to provide at the time of investigation was from 2022. We discussed I would need the most recent copy for proof of disposal.

Concern No.	53733	Concern Info	To whom this concerns: There is a meat processing plant out of Summersville, MO about four miles out of town on north 17 Hwy. The smell is horrible. It comes from back in behind the Zimmerman meat Processing plant. Possible a dumping sight back in those woods? That is were the smell comes from. It was such a strong smell yesterday it was sickening. Concern for the water that could be getting contaminated plus the air too. Thank you.

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
Comments	<p>I arrived at Zimmerman Meat Processing at approximately 9:50 AM on June 9, 2023. As I was approaching the facility, I had my car windows rolled down and did not detect any odors with just my nose. I pulled over on the side of MO-17 approximately 200 yards (according to Google Earth) from Zimmerman Meat Processing. I was located in a spot that was off of the Zimmerman Meat Processing property. I used the Nasal Ranger to try and detect any odors and filled out an odor memorandum as well. When I began using the Nasal Ranger, the temperature was 70 degrees Fahrenheit, the wind was coming from the West at 5 mph, and the sky conditions were mostly cloudy. I used the Nasal Ranger at every dilution ratio (from 15:1 to 2:1) including the blank settings, and never detected an odor. I drove up and down MO-17 a few times to see if I could ever detect an odor with my nose, but I could not.</p> <p>I then went into Zimmerman Meat Processing and spoke with an employee. The employee told me that neither of the owners were in today, but that they would be available the next Monday. I gave the employee my business card and explained that the reason for my visit was an odor concern we received the day before. I asked the employee if they had noticed any malfunctions, strong odors, or anything out of the ordinary the past couple days. The employee did not notice anything unusual the past couple days. I gave the employee a copy of PUB2200 - Odor, Dust, Asbestos, Open Burning and Freon Emissions and asked if she would relay the message to the owners. I also stated that I would call back next week to speak with the owners about the situation as well. I thanked the employee for her time and left the facility.</p> <p>On June 12, 2023, at 9:47 AM, I called Zimmermand Meat Processing and spoke with Josh Cartwright, Co-Owner. I explained to Josh that I was there last Friday and didn't detect any odors with my nose or with the Nasal Ranger. I asked Josh if he had noticed anything unusual recently and he said no. Josh did mention that their waste is put into a dumpster and hauled off that way and that the dumpster is picked up on Wednesdays. He assumed that maybe with the increasing temperatures and some waste sitting in there for a few days that that could have put off some odors. Other than that, Josh could not think of any out of the ordinary events that had taken place recently.</p> <p>did not detect any odors with my nose, nor did I detect any odors with the Nasal Ranger at any of the dilution ratios or blanks. Josh Cartwright, Co-Owner, had not noticed any malfunctions or unusual odors recently, but suggested that some odor could have been put off by his dumpster that isn't picked up until Wednesdays. I observed no violations of Missouri Air Conservation Regulation 10 Code of State Regulations 10-6.165 Restriction of Emission of Odors.</p>

Concern No.	53770	Concern Info	EPA received concern on May 29, 2023. MODNR received on June 8, 2023. Mann's fish market has been polluting the air years. The past months it has become unbearable causing people in the area to be nauseous and kids forced to stay inside their homes because of the foul odor. The odor is so strong that penetrates my home and I literally have to hold my mouth and nose shut to avoid inhaling the smell.

I advised them of the concern, odors detected, and observed trailer. Mr. Mann advised that a refrigeration unit that is typically used to store processed fish(catfish/buffalo) for sale at the location until removed for disposal is currently inoperable. He advised it has been down for some time. He stated the drums are holding processed fish until removal. He advised that he uses Dar Pro Solutions located out of Union City, TN for removal of the processed fish, and that they take for final disposal at a renderer for catfood production. He noted they have had vehicle issues. The most recent receipt that Rebecca Mann was able to provide at the time of investigation was from 2022. We discussed I would need the most recent copy for proof of disposal.</p> <p>I questioned if Mr. Mann had lids/clasps for the drums to minimize odors at this time, to which he said no. I advised him to locate some. I mentioned options of staging the trailer indoors, to limit odors. Additionally, I advised him to look into repairing his refrigeration unit and getting the waste picked up timely. We discussed the storage solution is not ideal, and that warmer weather conditions will only aggravate the situation. I advised at the time of inspection, the odors did not meet odor violations, but efforts must be conducted to eliminate any further potential. I advised I would be conducting further odor monitoring after leaving.</p>

<p>I conducted odor monitoring at the same location as prior from 1127 Hours to 1142 Hours. Periodic odors were detected, but only 2:1 odor limits or via nose.</p> <p>After leaving the site, I contacted John Wofford with the New Madrid/Pemiscot County Health Department for awareness. I also contacted Barry Gilmore, Code Enforcement Officer with the City of Caruthersville, for awareness.</p> <p>I left a voicemail for the Concerned Party. No return call.</p> <p>On June 14, 2023, I contacted Rebecca Mann. She advised the drum waste were removed on June 13, 2023. She advised that she discussed with DarPro Solutions regarding an increased pickup schedule (twice a week, or as needed). She noted that their financial situation would not allow for the purchase of a refrigeration unit for holding. She sent an email with a copy of the disposal facility receipt and plans to use heavier plastic for covering the drums, as well that drums are cleaned after removal. I recommended drum lids and locking clasps to reduce odor and wildlife concerns.</p>								
SERO	6/15/2023	6/11/2023	Collins Pallet, Inc. Tom Collins, Owner	Ellsinore Carter	Open Burning	TR		
Concern No.	53822	Concern Info	CP states A pallet and lumber site nearby is burning a large amount of pallets or other items. A large plume of black smoke was coming from the back of the property all day and it smelled all day.					
Comments	At the time of this investigation, no open burning was observed. The on site contact was Chris Owen who is also the Fire Chief for Ellsinore. Chris Owen stated that the production level for this facility is less than 8,000 board feet per day. Only untreated wood waste is open burned. The untreated scrap wood is open burned because the amount produced is not all usable as kindling for residents and others who want it. Chris Owen stated that a greater percentage is hauled away by private parties when it is the winter season. I left my business card, the regulation Missouri Air Conservation 10 Code of State Regulations 10-6.045 Open Burning Requirements, the fact sheets: Facts on Open Burning Under Missouri Regulations, Managing Construction and Demolition Waste, and Management of Scrap Tires.

SERO	6/13/2023	6/12/2023	unknown	Rolla Phelps	Fugitive Particulate Matter Asbestos	DB		
<p>Concern No. 53906 Concern Info Dust from a demolition project at 1703 N. Elm Street, Rolla, Missouri is crossing property lines. No asbestos project notification for this project has been received.</p> <p>Comments arrived at the demolition address at approximately 11:00 AM on June 13, 2023. I pulled over on West 18th Street and observed an excavator actively picking up debris and placing it into a roll-off dumpster. The building at 1703 North Elm Street had already been completely demolished by the time I had arrived. There was some dust being stirred up from the excavator picking up debris that was coming very close to leaving the property. The roll-off dumpster was located very close to North Elm Street which made it difficult to keep dust from leaving the property. A gentleman standing in a bordering parking lot was actively spraying the debris with a hose.</p> <p>I approached the gentleman with the hose and spoke with Chris Steger. Chris is the main contact for STL Pi Kappa Phi Alumni Housing Corp, which is the property owner. Chris informed me that the building being demolished was a Pi Kappa Phi fraternity that had been vacant for a few years. The property owners were doing the demolition; no outside company was involved. I asked Chris if any other residences had been demolished recently or if they planned to do any other demolitions this year. Chris told me that this was the first demolition, but that they plan to demolish the building located at 1704 North Pine Street (the building adjacent to 1703 North Elm Street) around January of 2024.</p>

SERO	6/15/2023	6/14/2023	Dennis Nunn	Birch Tree Shannon	Open Burning	TR		
SLRO	4/18/2023	4/11/2023	Unknown	Franklin	Open Burning Land Disturbance	HH		

Concern No. 53874 **Concern Info** Caller informed that renovations are being conducted on a property on the south side of the post office and the workers are burning demolished material. Caller stated that it included decking and shingles from the back portion of the house.

Comments At the time of this investigation, no open burning was taking place. I discussed with the Responsible Party, Dennie Nunn, that asphalt roofing shingles cannot be open burned under Missouri Air Conservation Regulation 10 Code of State Regulations 10-6.045 Open Burning Requirements. Dennie Nunn stated that all the shingles from this house renovation project had been hauled off site for disposal. I discussed the open burning requirements and prohibitions of 10 CSR 10-6.045 Open Burning Requirements with Dennie Nunn. I left Dennie Nunn my business card, a copy of the regulation 10 CSR 10-6.045 Open Burning Requirements, a copy of the fact sheet Facts on Open Burning Under Missouri Regulations, a copy of the fact sheet Managing Construction and Demolition Waste and a copy of the fact sheet Management of Scrap Tires.

Concern No. 53358 **Concern Info** Ray Gullet contacted the St. Louis Regional Office to inform us that someone is clearing land without a permit across the street from Dave Sinclair Chrysler/Dodge. He stated that the clearing has been going on for a few weeks now, and there is no evidence of sediment fences or a permit, and that today when he drove by he saw open burning on the site. He is concerned that the burning could cause problems for surrounding buildings, and that Land Disturbance work is being done without a permit.

Comments On 4/18/2023 I teamed up with Heather Johnson and Debbie Vergas from water pollution program to investigate the concern, There was no burning during our investigation.

Mr. Khan was very understandable and compliant, I explain to him the Open Burning rules (cut wood to 4 foot piece, have the fire pit 200 yards away from any structure, and burn from 8:00-4:00 PM daily).

Comments	On April 14, 2023 I reviewed GM past inspection reports from this office for any violations. On April 17, 2023 I visited GM area. The wind was 18 MPH out of south, the air temperature was 62 degrees F. Stayed in the area for about an hour . I did not notice any odor from the GM plant. I contacted the CP by phone. He resides at 1931 Mennemeier Drive Wentzville 63385 about 3.5 miles west of GM, near highway P. He told me there is no odor today. The odor mostly comes in the evening hours(10 PM -10:30 PM). I drove to the CP address anyway looking for other odor sources in between. The odor was noticed during the Easter weekend. I called GM Environmental Engineer (Vickie Heberlie). She told me the plant was closed during the holiday weekend, which included the paint booth water collection and recycling system. Previous odor investigation reports I reviewed indicated that the shutting down of the paint booth water collection system allows its content to become stagnant, resulting in the conditions for excess odors to eventually be emitted after the plant was restarted.

SLRO	4/18/2023	4/13/2023	Neighbor of Kristy Peebles	Jefferson	Open Burning	MC		

Concern No. 53359 **Concern Info** The concerned party (cp) states that her neighbor is burning trash, tires and aerosol cans nightly. The fire department has responded before but they told her that she needs to call the Department.

Comments MSC 4/18/23: I attempted to call Kristy Peebles, I left a voicemail with my name and contact information. The concern form does not have an address for the source of concern (SoC), what day the fire department (FD) was at the SoC, or any contact information for the FD or SoC. If I do not hear from Kristy I will assume it was Festus FD and see if I have enough information to go off of to find an incident report.

MSC 4/19/23: Called Festus Fire Department. Was told that Chief Jeff Broombaugh was out but would return tomorrow.

MSC 4/20/23: Was able to speak to Chief Broombaugh. I first asked what the address of the source of concern was he stated 521 South 5th street in Festus. I inquired about any incident reports containing information about what was burned and he gave me the following information: Stated that they had been out to the source of concern multiple times. He stated that in the start, there were some questionable items being burned like wires and concrete forms but on all recent calls, it has been untreated wood and brush being burned in a pit. He stated they never saw evidence of aerosol cans. I gave him some information about how we generally handle situation like this on our end and our department can use that anything found in a burn pile in an incident report.

After talking to Festus FD I once again attempted to call Kristy Peebles at the provided number. I was sent to voicemail and left a message describing findings, next steps, and gave contact information in case she cared to discuss.

--------	--------------------	---------------	---------------------------------	-------------	-----------------	--------------------	-----	------

Comments Replied 4/18/23: "Hi Annamarie,

Thank you for submitting this concern. I'm sorry to hear that you are dealing with this strong odor. I'd like to get a little more information from you so that we can investigate it and hopefully figure out where it is coming from.

Are you still experiencing this odor?

When did you first experience the odor? Is there a time of day, or day of the week when the odor is the strongest?

Do you have any theory as to where it could be coming from? I looked up your address and I'm not seeing any likely sources in the immediate area, such as industrial parks. If you happen to know what direction the wind was blowing when you noticed the odor, that would be very helpful as well."

CP responded: "Hi David,

Thank you for responding so quickly. The smell stayed for about 4 days. Spire gas said they detected no natural gas, propane, or methane. The smell came in like bursts not constant.

So the wind and the smell was coming from the direction of my neighbors house 2090 country club rd. That neighbor does a airplane parts business out of her home. She claims to not have been

doing anything that would cause such smell. However when she came to my house the day Spire was over she was dressed in a PPE zip up suit and blue rubber gloves and smelled just like what I was experiencing.

I don't know what chemicals she works with or if she has to follow any environmental regulations. The smell is not occurring at this time."

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
Comments	<p>MSC 4/18/23: I attempted to call Bill Nack. The Voicemail inbox was not set up so I was unable to leave my contact information. I will attempt to call again.</p> <p>MSC 4/19/23: I called back the Concerned Party and was able to speak to them. They stated that the contractor is H and M Concrete and that the dust is usually worse during "Cutting", primarily done in the afternoon. They asked going forward if they could remain anonymous, I stated I would not include their name on anything going forward but that technically their name is already on forms and could potentially be sunshined.</p> <p>13:30 I drove up Romona Lane and saw segments of completed street replacement during this time I saw a dump truck kick up some dust. I continued driving down the street until active pouring blocked my path. I stopped to observe noting trucks labeled "H and M Concrete" and a watering truck (inactive): this was at the corner of Romona and De Porres. I drove up De Porres Street and saw a contractor with a different water truck spraying the road. I made a second loop around this area. I did not see the actually "cutting" that was described as producing the worst dust so I looped around to access Romona Lane from Dingleline Road Tara Lane.</p> <p>14:00 At the intersection of Tara and Romona I was able to view the concrete cutting. This process removed the old concrete so that the area could be prepped and then the new concrete could be poured. Machinery seen involved: Dump Trucks, Excavator, Front end Loader, Concrete Cutting apparatus, and potentially an air hose. The largest production of dust was coming from the concrete cutting at times it left the entire street hazy for a brief period. couple times during my observation, a dump truck would kick up dust during a gust of wind. The wind direction kept the dust on the street but if blowing another direction could have left the property boundary. I left the location at 14:30.</p> <p>MSC 4/20/23: I called H and M Concrete to inform them of my findings and that a concern had been raised in regards to their practices at Romona Lane. I spoke to a Trent representing the company. He stated that they have a street sweeper and water trucks on site. I asked how the control devices are used. He said that they use the street sweeper regularly and the water truck is used in areas where it will not damage the concrete or effect the product. Essentially the concrete cutting cannot have water on the holes before or shortly after cutting prep and pouring. It was stated that they would speak to the on-site coordinator to find a solution to the concern, and that they would evaluate what they can do better.</p> <p>After talking with H and M concrete, I talked to the Concerned Party to explain my findings and future steps. I told them what the contracting company told me and asked them to call us if they do not see an improvement or if dust leaves, the property boundary and we will continue the investigation.</p>

Concern No. 53360 **Concern Info** Date of Incident or Date First Noticed
04/19/2023
Please describe your concern, including the location on the property.
Work on the write up/ woman's locker room has been going on. There is asbestos floor tile in the area and it has been taken up by a contractor but not an asbestos company. It was not disposed of properly or reported that we know of. Several people use this office space and were not aware of the asbestos until after work had begun. They now say it was done on a Friday but there was no tenting of the area and it all uses the same duct work for the entire building. We are concerned that people are / were exposed and can not get answers from management.

Comments On 4/25/2023 at 1:00AM I met with Mr. Oatman to investigate the women bathroom area, The floor tiles area is about 70 SQFT. I asked Mr. Oatman the method that tile's were removed, I was told the tiles were removed by stripping the tiles by a metal bar, I asked if they were friable and I was told non had broken to pieces and were hauled last Friday.

Concern No.	53361	Concern Info	Date of Incident or Date First Noticed 04/02/2023 Please describe your concern, including the location on the property. Homeowner openly burns trailer loads of tires in side yard. happens once a week.					
Comments	04/20/23 I drove out to the property at 131 Pleasant View Drive. I did not notice any burn piles or any active burning. There were scrap tires on the premises. Soon after arrival, I met with Tim Davis. I asked for Chad Canoy, and Mr. Davis informed me that Chad Canoy no longer owned the property and that Mr. Davis purchased the property in October 2022. I explained to Mr. Davis that we recieved an open burning concern relating to scrap tire burning. Mr. Davis stated that a few weeks ago there was an issue with open burning, and the fire department came out and informed Mr. Davis of the regulation, which he was unaware of before. When talking to the fire department, Mr. Davis agreed that he would not burn scrap tires or any other prohibited items under 10 CSR 10-6.045. According to Mr. Davis he has not performed any prohibited burning activities since the initial incident. Mr. Davis stated there has been some tensions with the neighbors. I gave Mr. Davis open burning fact sheets and fact sheets on managing waste, which he accepted. I explained if there is another concern that is submitted, it will be investigated again and depending on findings could result in elevated action. I gave him my contact card if he had any questions. At the time of the investigation, no violations of 10 CSR 10-6.045 were noted.

--------	--------------------	---------------	---------------------------------	-------------	-----------------	--------------------	-----	------

Comments MSD investigated the site on 4/21/21. Jason Peterein, P.E. sent us this e-mail: "A member from my team was at the site at around 11:30 this morning, and did not observe any odors. An MSD maintenance crew also followed up to check the sewers in more depth and did not notice any abnormalities or odors consistent with what was described in the concern."

I e-mailed the CP on 4/21: "We received your concern and will be looking into this odor to try and identify the source. Is this the first time you have experienced this odor, or is it an ongoing issue? Is the odor still noticeable?"

If this is an ongoing issue, is there typically a time of day or day of the week when the odor is strongest?

We're aware of odor issues coming from industrial facilities across the river in Sauget, Illinois. Since you're located close to the river, the source of the odor could be in Illinois and out of our jurisdiction. Weather data show very little wind this morning – do you happen to remember if there was a breeze when you noticed the odor, and which direction it was coming from?

Any information you can provide may be helpful. Thank you for letting us know about this issue and have a great weekend"

Same day, CP responded: "Good morning David,

Thank you for your quick response!

This is the first time I've experienced the odor. I'm not sure if it is still ongoing but I can't leave my office to check outside at the moment. I smelled it strongly at 9 and again at 9:45.

I don't think there was a breeze. It felt like it had permeated the air and was just sitting there. I wish I could be more specific.

Thank you for your help."

Concern No.	53364	Concern Info	MSC 4/27/23: Was called by a Marthasville resident about open burning occurring on a residential lot. Reports of noxious fumes and specifically a wheel chair being burned. It was stated that properties are large and it would not be possible to see the burn pile from a road. Police and the fire department have been called and responded to the area (Marthasville Volunteer Fire Dept). Stated the source of concern has interacted with police and the concerned party mentioned drug suspicions. This has been going on a few years now. The concerned party stated they wanted to remain anon on the Compliance Assistance letter that will likely be sent but would like the department to have his information for a follow-up. I explained Sunshine requests and they stated that was fine.					
Comments	MSC 4/27/23: I called the Marthasville Fire Department and spoke with Sean Johnson. We exchanged contact information and he stated he would send me the incident reports from the source of concern. He was not sure if they would include what items were in the burn pile as they are trying to become more thorough in their reports. I explained to him that with open burning concerns we can use information found in their reports to determine violations. He said he would send me the reports tomorrow. In the mean time I will send an open burning compliance assistance letter to the SoC with fact sheets.

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
Concern No. 53555 Concern Info Mr. Bob Watt called in an open burn concern on properties located at 35 and 82 Arcadia Lane in Winfield, Missouri. The properties are located next to each other. Mr. Watt says that the RP burns trash such as plastic furniture and toys in 55-gallon drums. He has called the fire department before and they put out the fire, and told him to call the DNR. The RP burns at random times both during the day and at night. He stated he has contacted the DNR before last fall. Mr. Watt also stated that the RP had buried trash such as appliances and particle board west of the building with the red roof a couple week ago and that you can still see the trash sticking out of the ground. I looked up the address on Lincoln county assessor webpage and the properties are both owned by LSG Ministries.								
Comments 5/5/23 - RLA - I looked up the site on the Lincoln County web assessor and confirmed the site. I also performed a satellite image search to look at the property. I read the letter of warning as well. I left a message with Mr. Watts to ask additional questions.								
5/10/23 - RLA - I spoke to Jamie Valentine and made plans for a site visit on 5/16/23.								
5/12/23 - RLA - Mr. Watts returned my call and I notified him that I was going to make a site visit to the property								
5/16/23 - RLA - I went to the site with Jamie Valentine and Kat Hertling and we arrive at approximately 1:45 pm. I spoke to Darren Morgan who owns the property alongside his wife Darlene. I explained why were at the site and he allowed us to look at his property. I encountered 4 burn barrells at the site, however I did not find evidence of recent burning of durable goods. I told Mr. Morgan that he cannot burn wood from furniture or other durable goods and handed him an open burning. There were large pile of miscellaneous furniture at the site and Jamie spoke to him about that.

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
Concern No.	53477	Concern Info	The CP's neighbors are burning trash, plastics, etc. The CP cannot stand being outside due to the constant burning. The C P alleges that there is a standard sized mobile home on the RP's site; however there are several people living in sheds on the RP's property. The CP stated that the a police escort would be advised. The CP also wants an investigator to call before they visit the site.					
Comments	MSC 5/10/23: called the CP to gather information and potential contacts for local FD of PD. It was stated that the fire department would not respond to that address due to safety concerns such as dogs and violent persons. The CP described the SoC as persons living in misc. building on the property. The Property is officially owned by an older woman named Lois Turmbull who allows the people to live there. It was stated that the burning occurs all day and all night. It was also mentioned that an investigator from DNR was looking into the property and spoke to the SoC. The Investigator told the SoC that no violations were discovered. Environmental Supervisor David Ruby and I attempted to find any record of a DNR Investigator at the location and found nothing. MSC 5/16/23: I attempted to call the CP to inform them of my planned actions. I left my name and contact information if they care to discuss. I will be sending CA letters to the address seeing as the people described are dangerous, no CA letters have been sent in the past, and recent weather conditions are likely to halt the burning (rainy). Should the CP call I will inform them of this action and tell them to call us in the future is this does not remedy the situation and we will move onto the next course of action.

Concern No. 53414 Concern Info Date of Incident or Date First Noticed 04/23/2023 Please describe your concern, including the location on the property. at 131 pleasant view drive, foley missouri. A man has been repeatedly burning tires in an open fire on his property Please provide driving directions from the nearest town and road intersection to the location of the activity causing concern from foley mo head west on highway Y to pleasant view drive on the left. property is on the west side of the road.								
Comments 05/09- complied documents and compliance assistance. This is the second concern we have recieved from this address. First investigation found no violations. 05/10- SEL drove out to 131 pleasant view drive in foley missouri. Upon arrival, I did not observe any open burning. I parked the car and walked to the front door. When walking up the driveways, I did notice scrap tires but no burning piles or evidence of burning activities. I knocked on the door, but recieved no answer. I left my contact information and compliance assistance documents on the door for Timothy Davis to contact me. Later that afternoon, Timothy Davis contacted me regarding the paperwork. He explained he has not burned anything since the initial concern. Mr Davis stated that there has been tensions between a neighbor and himself. He stated he has been using the compliance assistance documents to correctly remove the scrap tires. He explained he has been disposing of tires periodically by cutting up the tires before disposal through his residential trash service, as he cannot afford a scrap tire hauler. He explained he is working on removing the tires, but due to residential trash service constraints he can only dispose of a few at a time. I explained to Mr. Davis that we appreciate his commitment, and that there was no open burning violations at the time of the investigation. I told him to contact us with any questions he may have regarding what is allowed.

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
Concern No.	53478	Concern Info	A caller wanted to report a concern regarding the property that neighbors his as well as the activities occurring there. For the past 6 days, the CP has seen trash and other stuff being taken to his neighbors property. Then, at sundown and into the night, individuals will burn the pile of dumped materials. The materials they burn include metal, beds, tarps, plastics, and cans. The property owner is currently in jail and has been for about two weeks. The burn pile has been a problem for years, but since the property owner was jailed, the burning has been happening constantly. The caller believe the responsible individuals may be friends of the property owner or may be "squatting" there in his absence. The CP stated that the fire department hasn't been out there, but law enforcement does do regular patrols of the area. The CP clearly stated that anyone potentially investigating the concern *should not come out without a police escort.* The caller is worried about the health of his family with all of the nearby smoke and fumes.					
Comments	5/12/23 Tried looking up address on Google Maps and Missouri Parcel Viewer - could not find 3323, and unsure which neighboring property is burning. Called and left a message. Explained that they should call the fire department and/or police next time they are burning. 5/12/23 spoke with concerned party. Property appears to be 3225 Creek Road. They apparently have not been burning for a couple of days. I explained that next time they burn, they should call the fire department. We will send a letter and fact sheet but it will be difficult to contact property owner if they are in prison. Concerned party thanked me for my time.

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
Concern No.	53479	Concern Info	A caller wanted to report a concern regarding his neighbor. The CP reports that his fiancée's neighbor is burning several burn barrels. The burn barrels include plastic, metal, and miscellaneous debris; the CP could not confirm if it was all originating from the neighbor's property. The RP does not burn every night, but when he does, the fires tend to go all night long. Once the burning is completed, the RP will dump the burned materials in the barrels right along the property line, right under the wire, and it eventually migrates to the CP's fiancée's property as well as downslope towards a "lake filled with catfish." The neighbor is the only house to not have trash pickup and they are the only ones to conduct open burning. Any time they are burning, the whole area smells like plastic. There are currently 6-7 piles of burned material sitting along the property line. The Fire Department has not previously been called when open burning is observed.					
			For anyone going on-site to investigate the concern, the CP says they can utilize his fiancée's property to observe the burn piles.					
Comments	On May 11,2023, I search the location and the surrounding area on google map to familiarize my self with locations in Londell, MO in Franklin County. I called the CP and left a message to let them know I will be investigating the concern on Monday may 15, 2023.							
	On may 15, 2023, I visited the site (316 Paradise Landing CT) . I noticed RP resides next door to the callers home. I did not see open burning at or around the site. I called the CP (Jack Osborn 314-974-2887) while I was on site asked him to assist me locate the open burning location. He told me normally the person starts the burning after midnight.

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
<p>Concern No. 53550 Concern Info Caller is concerned that his neighbor burned several large piles of brush on their property line. The brush is from trees that were cut down when the neighbor built a trail through their woods. Neighboring property is owned by a contractor, Four Queens LP. The brush piles contain only vegetative debris from the property they are being burned on.</p> <p>Comments I spoke with Mr. Deutsch on 5/10/23 and 5/11/23. He explained this situation and I explained Missouri's open burning regulations. No violations of 10 CSR 10-6.045 "Open Burning Requirements" were alleged. All of the material being burned is untreated wood waste (trees, limbs, vegetation, leaves, etc.). The only time open burning of this material is regulated under 10 CSR 10-6.045 is when it is part of a commercial/non-commercial collection operation, like a tree trimming service that collects debris from multiple properties and burns it on another property. Or, if it is part of a commercial land clearing operation. What the concerned party described was his neighbor cutting down trees to clear a trail on his property for personal use, which would not fit the criteria for a collection operation or commercial land clearing.</p> <p>The only other criteria that would make this a regulated activity under 10 CSR 10-6.045 would be if the local fire department/police were to declare it as a public health hazard or a hazard to vehicular or air traffic. Only local agencies can make this determination, our department cannot. Both Myron Lewis and myself spoke with the Hillsboro Fire Department regarding this incident. The fire department told us that they are burning in a safe manner and did not see any risk of this fire spreading to the forest or nearby structures. They also indicated that they have been called about this burning multiple times and see it as a property line dispute, and not something that violates our regulations.</p> <p>On 5/17 I called and spoke with John Parks of Four Queens LP. I explained the situation and asked if the burning was associated with any commercial land clearing. Mr. Parks told me that Mr. Deutsch encroached on their fence line and piled a lot of brush. The brush was pushed onto their property and they burned it in a safe manner, in coordination and following guidance from the Hillsboro fire department. He said that they have not cleared/developed this property, they have only built a trail through the forest for personal ATV use. They said they may develop it at some point in the future but currently have no plans.</p>

Comments 5/12/22 DBR - looked up property on Parcel viewer, found home/mailling address of 1850 St Paul Rd, O'Fallon, MO 63366. On 5/15/2023 At 11:30 AM, I met with the tenant Mr. Doug Greenwood at the above property. Mr. Greenwood is renting the house on the property for over ten years, The owner of the property is Brent Peine has a phone number 636-439-3504. This property is about six acers and Mr. Greenwood directed me to the area of concern, I saw a lot of tree limps, logs and sod , I did not see any railroad tied, nor any burn area. I gave Mr. Greenwood my Business card and a fact sheet on Railroad ties and asked him to give to Mr.Peine.

Concerns Investigated Between April 16, 2023 and June 15, 2023

Note: "Concern Info" refers to the information provided to the department by the concerned party. The information seeks to accurately reflect the nature of the allegations as it was made. Those statements of allegations do not necessarily reflect the legal

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
Concern No.	53549	Concern Info	CP states that the neighbor does not have trash service and regularly burns their trash. Stated that there are videos of tires and plastic being burned with black smoke. CP called before and a concern (#4262) was created. CP has talked to the local sheriff's office and was advised to speak to the neighbor. CP stated that when she went to speak to the neighbor about the burning at the request of the police department, he pulled out a gun, shot into the yard, and told her to leave. CP stated that the odors from the burning are causing multiple issues for them.					
Comments	MSC 5/16/23: Called the CP to gather more information and touch base to see if she had any information she'd like to give me. I also informed her of my findings and actions the last time a concern was submitted. It was stated that noxious fumes are being burned from suspected tire burning it was mentioned that she had a video of this though it was not expressed with confidence that specifics could be made out from the burn. I asked her to send it to me anyway. I informed her that I had tried to make contact with Officer Christopher Masson and his supervisor to no avail during the duration of the previous concern. To this the CP mentioned that she was going to the sheriff's office to pick up the incident report. She sent it to me later that day.							
	MSC 5/17/23: The tire burning video was taken on April 6th of assumingly this year. I was unable to open the video as it was sent as an iCloud link. I responded to the e-mail the same day indicating the problem and suggested sending in a different format. I also explained that the incident report did not specify what was being burned and therefore it could not be used to pursue a violation.							
	MSC 5/23/23: I never heard back from the CP in response to my e-mail so I gave her a call and left a voicemail with my contact information. I also searched for the local fire department the nearest to the SoC is Beaufort-Leslie Fire Protection District Station 1&2 (573-484-3333) I called them and left a message with my contact information briefly explaining the situation and asked them to please call me back for a brief discussion.

Comments I drove around the area on 5/16 and did not observe any odors. On 5/17 I e-mailed the concerned party:

Hi William,

I'm an air pollution investigator with the Missouri Department of Natural Resources, St. Louis Regional Office. I received your concern regarding strong odors in the McKinley Heights area. I apologize for the delay – this concern was forwarded to us from the EPA, and I just received it yesterday. I drove through the area yesterday and did not observe any unusual odors at that time.

We have received many similar concerns in this area over the last few years, and have been monitoring the facilities on the Missouri side of the river. Based on our current information, it is most likely that the odors are originating from Veolia Environmental Services in Sauget, Illinois. This facility is regulated by EPA Region 5. We will create a log of your concern, but recommend you contact EPA Region 5 and report the odors directly to them.

You can contact EPA Region 5 at r5hotline@epa.gov, at 312-353-2000, or by submitting an online concern form at <https://echo.epa.gov/report-environmental-violations>.

We are also aware that the EPA has been conducting monitoring in the area and plans on holding a community meeting at some point to discuss the odors with St. Louis residents. I haven't heard any updates on this in a while, but I will add your contact information to a list so that we can provide you with an update once a date is set for that meeting.

Concern No.	53558	Concern Info	EPA concern: "For the last several months, there has been an odorous smell of fumes in the Soulard neighborhood of St. Louis City. I live in the Soulard Market Lofts. Often when I exit through the back of the building and head southeast, there is a smell of fumes. To me it smells like natural gas or sulfur. I have noticed it most nights between 8 and 9 pm. It has hot spots throughout the neighborhood. Right on the backside of my building, near the pool, alongside the back of Pieces Bar, it smells strong. There is another hot spot near Bogarts, Mission Taco, and International Taphouse. I've smelled it randomly throughout the neighborhood. I've never smelled it in the morning or midday. It is always in the evening. I have no clue where it comes from. I saw a post by the EPA and my neighborhood that the EPA needed help investigating the issue. I've experienced it several times. It has made me nauseous and light headed.

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
<p>Concern No. 53695 Concern Info EPA concern: "Bloomsfield Excavation is blowing lime dust all over a residential area."</p> <p>Comments MSC 5/30/23: I investigated the development on McNutt Street, accompanied by Kathleen Hertling who was shadowing. The development is directly north of the McNutt Roundabout and West of Interstate 55. We observed the area from a commuter parking lot directly south of the site. We were at the location from 10:30am-11:15am</p> <p>The biggest area of potential concern came from the main haul road as dump trucks exited the site. The dust from the trucks continually blew toward the roundabout and left areas around and very near the street hazy. Dust was also being produced from Tractors dragging graders, this dust never left the property boundary. Excavators and a crusher were also active on site but produced the least amount of dust and was furthest from the boundary. At 11:05am, a street sweeper thoroughly swept the round about area. About this time, another car parked next to us and took pictures of the site.</p> <p>Driving around the roundabout we took note of the name of the company "Bloomsdale Excavating" as well as a website listed www.blex.com. We also went to the neighborhood to the east of the site and noticed no dust accumulating on stationary objects like mailboxes, fire hydrants, and rooves.</p> <p>After getting back to the office I called Bloomsdale Excavating a 573-483-2564 and spoke to Mandy. I informed her that a fugitive dust concern had been received at The McNutt Street development and that I was out observing today. I asked her what practices the site implements to lower dust. It was said that last week they spread lime to lower the dust and that a water truck is on site. I recommended that more frequent watering take place on the main haul road especially on hot dry days. She stated that she would inform the crew and see about getting a second watering truck at the location. I informed her of the other people taking pictures and she stated that a few people had called that today about that location.</p>

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
Concern No. 53845 Concern Info From EER: "The caller reports that the company is burning railroad ties and has burned other wastes at their property including waste tires. The caller has taken photos of the burn piles that have been added to the incident. While the duty officer was speaking to the complainant, a second caller, Mr. Mike Foppe, who works for The Missouri Department of Transportation (MoDOT) and is an Emergency Planning Officer for the area, called to report the same complaint. Both people stated that the company has been burning solid waste from the business since they purchased the property 2+ years ago and did the same thing on their old property on Route E (a block over) before they were kicked out of their lease by the former owner."								
Comments MSC 6/13/23: I called the concerned party to gather more information about the concern and determine the best course of action. The CP stated that the open burning had been going on for a few years now at this property and another they had moved from nearby. I asked when the most recent burning had occurred and the CP listed two separate burns: the first occurring on June 2nd or 3rd burning railroad ties and the second occurring June 9th burning tires mixed in with wood. Photos were provided showing both burn piles before they were lit. Since the most recent burn took place a little under a week prior to the call I asked if any burn piles could still be seen with alleged materials visible. It was stated that it was unlikely any materials would still be clearly visible but that the burn piles are usually visible on a nearby public roadway. I informed the CP that I would start the process by sending a letter and relevant fact sheets to the SoC. I also told the CP to continue to communicate with the department if the burning does not cease and we will continue the investigation. I made sure the CP had means to contact the proper section if I was not available to take the concern. Useful information: the burning usually takes place at night (but not always), the police have not been involved and she is unaware of any hostility exhibited from the SoC, She has also been in contact with EER (Ken Hannon).

Concern No. 53844 Concern Info Odor coming from St Louis Marble located at 1565 Fenpark Dr 63026 is creating breathing problems for the residents near The caller resides nest door is affected by the unpleasant odor.								
Comments 06/14/23 SEL Around 10 am I arrived in the area of the facility. The area is not residential and has many businesses. None of the businesses appeared to be manufacturing facilities. I had my windows rolled down and drove around the surrounding area. I did not notice any odors. I drove up and down FenPark Drive and did not notice any odors. After this, I pulled into the parking lot of Johnston Supply (1536 FenPark Drive, acrosss the street from ST Marble), turned off my car, and got out. The wind was blowing from West to East (from STL Marble towards me) No odor was noticed. I stayed in the parking lot of Johnston Supply for 10-15min and did not notice any odors. Following this, I drove over to STL Marble and drove around the entire facility with the windows down. No odor was noticed. I parked and entered the facility. I spoke with the plant manager, Pam, and informed her we had recieved an anonymous odor concern for STL Marble. Pam stated that she does not know what has caused this. She explained that the facility does not even pour marble anymore, and recently has only been processing and cutting fiberglass baseball plates. I gave her my contact information, and told her that if we recieve any more concerns we will investigate again. I also told her to contact me if she notices any odorsin the area.

Concern No. 53852 Concern Info Concerned Party States: "I am smelling the same odor that I think is from the Aluminum factory in Dutchtown. It is not from the forest fires in Canada. Can you please investigate?"								
Comments 06/14/23 SEL I investigated the odor concern regarding PreCoat Metals at 4301 South Spring Avenue. I arrived at the area around 11:00am. I drove throughout the neighborhoods to the North, East, and South of the facility, stopping periodically. I did not notice any odors. I parked on Bingham Ave, at the corner of Giles Ave, around 200-300 ft east of the facility. I walked around the area for around 10 min and did not notice any odors.								
While walking around the area, I spoke with a resident in the immediate vicinity of the facility. I asked if they had any instances with the facility or have noticed any odors. The resident stated they have never noticed any odors, emissions, or smoke coming from the facility.								
Following my investigation, I visited the facility and spoke to a facility representative. The representative stated that they were unaware of anything that could have caused such odors. They stated that around noon on June 13, 2023, the facility had shut down one of its production lines. It was still shut down when I visited today. The facility had been running its second production line still, but stated that it was operating normally and no issues had occurred. The facility was recently inspected on January 31, 2023. There was no violations noted during the inspection, and the facility was in compliance.

Concern No. 53853 Concern Info From EPA Citizens Tip Line: "Wind is now WNW. Heavy chemical smell in the air. Not a familiar odor but chemical is synthetic. We've had this problem since we've moved here 2.5 years ago when the breeze is from the NW."								
Comments On June 15, 2023 I called Julie Van Dielen to let her know I will be investigation the odor concern and will be visiting the area on June 20, 2023. I also gathered information online to find out business in the area that may potentially generate the odor. I located a couple of business in the area including Precoat Metal Fabrication located at 4301 S Spring (intersection of Bingham Avenue and S Spring Avenue). On June 20 , 2023 I visited the area. I drove to S 8th and Bingham (the location identified by the caller). I stayed about 15 minutes in the area. There was no odor. Because of the nature of the business and the process involved I did a closer look of Precoat Metal Fabrication. Searching the i n t e r n e t, I learned that Precoat M e t a l Fabrication uses c o a t i n g s and chemicals in its operation . I parked and wa l k e d around the building of Precoat M e t a l s for 45 minutes . I t was a sunny da ty. A m b i e n t a i r t e m p e r a t u r e was 8 0 degree F . Wind was calm at about 5 m i l l e s per hour out of North. There was no odor objectionable to me. I called Julie Van Dielen. She resides 4 blocks east of Precoat Metals towards Grand Avenue. I told her my finding. She said there is no odor to day at her location either. She said It is hit and miss situation. She asked my phone number. I provided the office phone number. She said she will call when there is odor in the area.

Concern No. 53209 **Concern Info** BNSF is again raising concerns over explosions and possible open burning at Springfield Iron and Metal.

Comments SharePoint #4800. On April 10, 2023 the Department received environmental concern #4800 in regard to explosions and possible open burning originating from Springfield Iron and Metal (SIM) which initiated a special night investigation on April 20, 2023. The only process on site that could contribute to explosions is the shredder, therefore I focused my attention on the shredder, which is exclusively operated at night. I (Treavor Bussard) arrived on site to Burlington Northern (BNSF) property at 9:30p.m. Weather conditions at this time were clear skies, with winds from the north at 12 MPH, a temperature of 57 degrees and a relative humidity of 67%. From this position I was able to get a clear view of the top portion of the shredder which at the time was not in operation. I then made observations along the property boundary between BNSF and SIM noting no noticeable differences in the condition compared to previous investigations.

Since it had been an hour and a half since the beginning of the investigation and no activity from the shredder had been observed, I then found my way to the North Kansas Expressway Bridge that overlooks SIM to the east. From this position I was able to view the majority of the property, including the shredder. I observed minimal activity on the property, (only lighting, no work activity). I then returned to my original vantage point on the BNSF service road. Over the next hour I did not observe any activity from the shredding process nor any indication of open burning on the property. I then ended my investigation at 1:00am April 21, 2023. A follow up investigation during the night may be warranted pending the submittal of additional concerns.

SWRO	4/20/2023	4/14/2023	Caleb Biancarelli - project supervisor	Springfield Greene	Land Disturbance Fugitive Particulate Matter	GE

Concern No. 53181 Concern Info Caller says a contractor is taking asphalt and concrete from the airport and crushing it near her house, and then hauling it back. She said the dust has been so bad, they couldn't go outside. She said you can taste it in your mouth. She also wants to know if they need a permit for crushing.								
Comments SharePoint #4724 At the time of the investigation there was no dust leaving the property. Spoke on-site to employee Jesse Blanke who stated that they were done crushing the concrete and the equipment is to be removed by. I spoke to Caleb Biancarelli, project supervisor, who stated that the crusher and trac-hoe was owned and operated by Ozark Mtn Crushing and that all crushing was done and the equipment was to be removed on that day. He acknowledged that they had received a concern from the airport about dust and had taken steps to correct the issue. They were placing water on the haul roads, and had been placing water on the pile of concrete and the crushed material. Large pile of crushed concrete and dirt pile present on the property. Monday 4-24-23 spoke to Caleb and he stated that they had processed 3,000 cubic yards of concrete starting on 4-13 through 4-19. Amount processed is well below portable permit in particulate matter per day. Site was not in violation of their land disturbance permit or portable crushing permit. Land Disturbance permit - MORA 21723 Ozark Mountain Crushing - portable permit - Port-0730? No violations noted during the investigation. No violations noted during the investigation. Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
Concern No.	53180	Concern Info	CP says that there is a chicken farm south of Fairview with a lagoon where they dump chicken waste and potentially chicken parts/carcasses. They say that they see trucks from other facilities/out of state taking chicken waste there to dump it. CP is primarily concerned with the odor from the lagoon as they can smell it in Fairview 2 - 3 miles away, but is also concerned about improper waste disposal and water quality impacts from the lagoon if it was not constructed appropriately. Says the odor is not the Fairview WWT lagoon and that they didn't have this issue until the landowner installed this lagoon. Says they believed that people had to own at least 500 acres to install a lagoon and that this landowner does not own that much.					
Comments	SharePoint #4749 After looking at the area of concern, it was noted that Denali Water Solutions operates an agrichemical storage basin nearby. I called the concerned party and explained the process of land application for beneficial uses. I also discussed the fertilizer exemption. I added that the material that was being stored and land applied was industrial byproduct from food processing plants in the area. I explained that the industrial byproduct is tested for a handful of parameters including metals and for nutrient content. I explained that when land applied correctly that there would little risk of ground water contamination. I discussed proper well construction and recommended periodic testing via the local county health department. I also went over the air regulations with the concerned party and noted that the practice of land application was exempt. The concerned party noted that they would contact their local state legislative members about changing the regulations and the exemption. No site visit occurred, discussed practice with concerned party.

Concern No. 53191 Concern Info Caller stated the construction crews that have been working on the Springfield Airport runway have been bringing concrete into the area and crushing it. The dust from the operation is drifting onto his and neighbor's property, contaminating the water troughs and covering the area with particulates. They are not washing the area down and are not doing anything to keep the dust down. They were burying the material for about the past year but now are crushing the concrete. The operation is located 50 ft from one house and 75 yards to another. All of the neighbors are upset and the company doing the work told him to mind his own business. Caller has pictures on his cell phone and would like someone to come out, take a look, and talk to the company. Caller is concerned about his livestock and what may be in the dust that is spreading over his property, which is directly east of the crushing site.								
Comments SharePoint #4755. No violation noted during the investigation. Same concern as 4703 and 4755.

<p>Concern No. 53277 Concern Info Anonymous reporter called regarding a Bob Higgenbothum owner of Jus Properties. He does clean up on historical buildings in the Joplin area. Reporter states that he has done at least 3-4 buildings. He wanted to inform us on the current building that they were removing lead paint and throwing it into a dumpster. None of the employees wore any kind of respirators and no filters were used inside the property.</p> <p>Comments SharePoint #4858 The location indicated above, 215 South Wall Avenue currently houses the Main Street Ax Company. While the location was closed at the time of the investigation, I was able to identify the property owner via information available from the assessor's office and the internet. I met with the owners representative Jeff Neal of Neal Group Construction, LLC and informed him of the concern. Neal was able to verify that no renovation was taking place at 215 South Wall Avenue. Renovations at this location were completed years ago.</p> <p>I contacted Bob Higgenbothum who met me onsite. He is working at 223 West 3rd Street. Higgenbothum described the testing which was conducted on materials at the site. Some paint on the ceiling in an area of the building contained lead and as it is still in good shape was left in place and will be worked around during the next stages of the renovation. Higgenbothum stated that no lead paint was disposed of in dumpster.</p> <p>No evidence of improper disposal was observed at the time of the investigation.</p>

SWRO	5/25/2023	5/2/2023	Justin Fohn	Barry	Sludge Odor	BM		
Concern No. 53386 Concern Info Concerned with runoff, drinking water contamination, odor, and increase in flies from land application. Comments SharePoint #4924 There was no active application at the time of the inspection. There were no indicators of recent application or runoff from the property. In the months prior to the Department receiving the concern, I had observed application at the site as well as frac tanks parked on the property. The observations were made while traveling through the area during the winter months of late 2022 and early 2023. I contacted Jesse Thomas, Area Manager for Synagro, by telephone. Thomas confirmed the company had land applied industrial byproduct under a fertilizer exemption. The source material was from the George's Inc. processing facility in Butterfield, Missouri. He stated all application at the site was completed during the first week of March, 2023.

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
Concern No. 53397 Concern Info RP has construction company Allison Construction and they bring construction and demolition waste, tires, and household garbage and dispose of this waste into a pit that has been dug on their residential zoned property. The RP has also burned this waste including the tires and construction wastes at times. Waste pile can be seen from Sunrise and Highway 176.								
Comments SharePoint #4925-Arrived on-site and observed the burn area from the driveway. The burn area consisted of metals, household items and a wooden headboard. Spoke to Kathryn Allison and she stated that as far as she knew her husband had only burned household trash and that they now have trash service, so no burning has occurred in recent months. I left a business card and requested that Lee Allison contact me about the burn. Spoke to Lee Allison via telephone on 5-25-23. He stated that the area had already been leveled when he purchased the property. The burn has consisted of household waste and some cardboard from his private home. No construction debris has been brought to the property by his business, his business consists of concrete work not demolition waste. Allison has already cleaned up the burn residue and the metals have been taken for recycling. He said he was committed to no burning of anything other than vegetative waste on the property. Lee Allison has already corrected the air pollution violation of open burning. No further action is required.								
SWRO	5/2/2023	5/2/2023	Denali Water Solutions	Newton	Odor Sludge	CR		
Concern No. 53398 Concern Info A lagoon has been installed related to land application of sludge and is causing an unbearable odor in the area and an increase in flies at the CP property.

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
Concern No. 53503 Concern Info The concerned party is concerned about the land application occurring in the field to the west of his house. He is concerned about the terrible odor, and he is concerned that the waste is going into Honey Creek. The land application was assumed to be from chicken litter, but he was not certain. The land application has been occurring nearly every day for the last 3 or 4 weeks. There are 3 large tank trucks that are parked just south of Frye Road and these are the trucks that are used for applying the waste. A semi trailer comes and fills the trucks, and the trucks land apply the waste. The concerned party has photos of the trucks and land application if the investigator needs them. The concerned party said the investigator can call him for more details if needed. The concerned party did not know the name of the company that is applying the waste.

Concerns Investigated Between April 16, 2023 and June 15, 2023

Note: "Concern Info" refers to the information provided to the department by the concerned party. The information seeks to accurately reflect the nature of the allegation as it was made. Those statements of allegations do not necessarily reflect the legal

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
Concern No.	53512	Concern Info	RP is burning and dumping (tires, cabinets, general household trash and other items) on the CP property. She stated that she has taken pictures and will testify to them. CP is concerned about the number of vehicles on the property and that they are leaking large amounts of oil and fluids onto the ground.					
Comments	SharePoint #5108 On May 2, 2023, I conducted an investigation at the location of 348 Apricot Lane, Reeds Springs, Missouri. Upon arrival, I found a small camper with no trespassing signs all over it. I knocked on the side of the camper because there was no door. I heard a voice from inside the camper I identified as Scott Holley, the property owner. I spoke to Holley, introduced myself, and advised him of the reason for my visit. He asked why folks keep bothering him. Holley stated that he throws his household trash on the backside of his property. I asked for permission to look. Due to his medical conditions, he was unable to walk with me. I found a small pile of household trash. Holley lives at the end of Apricot Lane. He has burn barrels for his trash. Holley stated trash service is not offered due to his location. He said he "just ran off a couple of squatters" that left their camper trailer. I found no violations. There is some scattered household trash but it is not leaving the property. I will contact the local health department due to the sewage being straight piped into the woods. I left my business card for any future questions. May 22, 2023, I called and spoke to the reporting party, Patricia Ketzler. Ketzler stated the trash in question was located on her property at the location across the road from Scott Holleys property. Ketzler stated the trash is from a squatter. She said she has cleaned up the majority of the dumped trash but is unable to reach a pile that is located in the woods. She has contacted the local sheriffs department, the department of aging and the health department and looking for any help with the situation. I advised her with the trash would be considered promiscuously dumped and that we have no way of enforcing this type of dump. She also asked if her well could be checked due to the vehicles that sat on the property across the road on Holleys property, that are now gone. I told her the local health department could direct her on how to get her well tested. Ketzler sent several photos showing small burned areas. The photos showed no burned tires.

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
<p>Concern No. 53541 Concern Info Burning vegetative waste large trees, burning in the backyard. Within 50 feet of homes. The concerned party called the Battlefield Department and they will not go over to stop it unless they have an order from the Department.</p> <p>Comments SharePoint #5144 Upon arrival to the property of concern located at 3411 S. Farm Road 148, I observed two individuals who were trimming and cutting down two trees in the front yard. I also observed smoke rising from the back yard. I then came in contact with Arthur Holman, landowner. I introduced myself, provided credentials, and explained the reason for visiting. Holman granted me permission to enter the property and view the burn area. This burn consisted of only vegetative wastes from the two trees on site. Holman stated that he was keeping most of the wood to take back to his property. I then explained the burn regulations to Holman. Since this burn consisted only of vegetative waste that originated on site and does not meet the definition of a land clearing or collection operation, setback distances do not apply. I informed Holman that this fire should be supervised at all times and should not be left to burn overnight. Holman stated he would be on site at all times and extinguish the fire prior to leaving. I then recommended that Holman reach out to Greene County or the City of Springfield as they may have other requirements for open burning. No violations were issued at this time. No Violations</p>								
SWRO	6/28/2023	5/22/2023		Carthage Jasper	Open Burning	CG		
<p>Concern No. 53569 Concern Info Caller is concerned with fumes from open burning at a neighboring recycle center. Caller says the recycle center burns about every day, except on days they are closed Caller says residents of her apartment building complain of the smells and becoming sick. Caller is also concerned with distance requirements of the recycle center to residential areas.</p> <p>Comments SharePoint #5137 Upon arrival at the location given above, I met with Lynette Cleaveland, Solid Waste Technician of the Carthage Recycling Center. I shared with Cleaveland the details of the concern. She advised me to call Julie Tilley, Manager of the Recycling Center. I contacted Tilley by phone and advised her of the concern. Tilley stated that the Center has received a large amount of brush this year, therefore causing the Recycling Center to burn more often. Tilley said she will share the concern with her employees and have them burn small piles of brush. The apartment building that called in the concern sits approximately 300 yards southwest of the burn pile. Open-burning setbacks are being met at this time. No violation found.</p>

Monthly Air Pollution Control Program Detail Report

Concerns Investigated Between April 16, 2023 and June 15, 2023

Note: "Concern Info" refers to the information provided to the department by the concerned party. The information seeks to accurately reflect the nature of the allegations as it was made. Those statements of allegations do not necessarily reflect the legal

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
Concern No.	53594	Concern Info	Caller stated that even going out onto their porch they smell a very strong paint/chemical odor. They believe it is coming from MO Casket Company and they have called about a year ago with the same concern. CP said the smell went away for awhile, but as of a few weeks ago it has come back. CP also has concerns about how this will effect the groundwater surrounding the area.					
Comments	SharePoint #5215 No detection with nasal ranger prior to entering the property. Showed up to Missouri Casket Company Inc.(MCCI) @10am and met Jody Eason @ 10:30am, the on-site manager. He showed us around the facility for about half an hour. They use three rooms to either paint or brush lacquer onto their caskets (see attached photo). Each room has a stack to the outside. Eason said they will be moving to a water-based lacquer soon, which is supposedly safer to breathe. I asked Eason about potential sources of odor, and he said the lacquer is probably the only possible source. They were not treating their caskets at the time we passed by the rooms. Eason has up to 25 employees. After Wes finished up talking to Eason about hazardous waste advice, we parted ways. Upon returning to the truck we noticed that a nearby burn pile (see attached photos) had some metal rings and spray cans, which is a violation. There was also a pile of cedar sawdust burning at the time. Eason had earlier confirmed that all the wood is untreated. We called him back to let him know about the spray cans and metal paraphernalia in the burn pile.Upon finding spray cans and metal trash in the burn pile, we will issue an unsatisfactory finding. We called Eason after this finding and he said he would immediately retrain workers on burn practices.

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
<p>Concern No. 53641 Concern Info Dust clouds coming from the salvage yard, concern for employees breathing it in. CP states they are using a water truck, but not like they should.</p> <p>Comments SharePoint #5223 I met up with the CP and other employees from Buddy's Auto Salvage and asked about the situation. CP presented photos collected from the past 10 years showing potential evidence of fugitive emissions. It appeared that these photos were taken illegally on Blevin's property. CP stated that emissions from Blevin's has been going on for years, and dust continually collects on Buddy's Auto Salvage cars. CP stated that Blevin's owner hired someone to wash the cars once but CP wants them to keep doing it. CP also thinks the drum dryer emits toxic fumes. Site manager drove from Mt Vernon to Springfield while I talked to CP so that I could meet up with him. I drove to Blevin's Asphalt to discuss the situation with the site manager. Site manager claims all permits are up to date, and he willingly showed us all records. He had up-to-date records for the watering truck. However, he did not indicate that he had records for baghouse pressure logs. He said their operation has been undergoing lots of turnover, so he didn't know which employees to reach out to for that. I did not see the watering trucks operating at all while I visited, but I also did not see signs of fugitive particulate matter. Before I left, I met up with the owner Derek Stokes. He was livid about Buddy's Auto Salvage because he assumed they were the CP. He claimed all of their issues derive from the nearby power plant stack. He said Buddy's Auto Salvage generates unnecessary criminal activity, and he has told his employees to "run over" CP if CP tries to go onto Blevin's Asphalt to collect evidence. No air violations observed during the investigation. I told CP to call us next time they see fugitive dust enter their property.</p>								
SWRO		5/30/2023	Denali Water Solutions	Newton	Residential Waste Disposal Odor

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
Concern No.	53673	Concern Info	Kemin Nutrisurance, 519 N 3rd St, Verona, MO 65769 and IsoNova Technologies, 18183 Highway P, Verona, MO 65769 Caller states Kemin and IsoNova buildings smell bad and can be smelt about a mile away from each building. States smell sticks to clothes and just smells bad, but like a poultry factory. Wants something done about the smell as it is now in two places and doesn't seem to be getting any better. Caller is George (417-229-9055) and states he has worked with Camille about IsoNova before.					
Comments	SharePoint #5276 I pulled up to the plant at approximately 1:38pm. About 200m south of Kemin, I got a 7:1 detection with the nasal ranger. However, wind was nearly zero so it was hard to discern whether this odor derived from Kemin (north) or BCP (southwest). I circled both Kemin and BCP a couple of times and did not get another 7:1 detection after 15 minutes. Next, I went to the CP's house and asked him some questions about his experience in Verona. He said he had lived here 65 years and the smells have persisted for as long as he can remember. He believes the new Kemin plant (red and gray building) will have reduced emissions. He said the smells are the worst in the morning, and that they probably come from the IsoNova plant 4 miles northeast. After we parted ways I drove to a couple of houses west of IsoNova to gain insight on other homeowners' complaints. I met Clint at his house near county road 1135 and he said he had only lived in the area for a year, but the incessant odor was probably the reason the previous homeowner moved out.

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
Concern No. 53676	Concern Info Air Quality: I live in Springfield Mo near a Salvage Yard containing an old quarry. The owner is filling the old quarry, which is within his rights, but the dump trucks scatter mud and debris on the road. The mud turns to dust which transforms our blacktop into a dust storm with each passing truck. Now I can't even mow my yard without creating a dust storm, not to mention dust in and on my house and vehicles. When I contacted the City of Springfield, the quarry owner rented a sweeping machine which brushed the dirt and debris onto all the residential properties in the neighborhood and created an enormous dust cloud. The City stopped responding to my complaints, so the problem persists. I'm inquiring to see if this is an issue where DNR has jurisdiction or is there another Department I can contact? Thanks for your time and any assistance you can provide. Sure, here it is. All Parts Auto Salvage. 2600 N. Benton Ave, Springfield Mo 65803. Owner: Alton Holsted. My address is, 2532 N. Benton Ave, Springfield, Mo. I have some photos if you can use them.							
Comments	SharePoint #5289 CP said dust has been an issue for 3 years, even though All Parts Auto Salvage (APAS) has been filling in a quarry for the past decade. CP says dumptrucks filling in quarry are primary source of dust - That whenever they enter or leave the facility they are tracking dust and mud. CP says he can't mow his lawn because there is so much dust that has collected. CP says APAS gets a street sweeper to try to clean up the road dust, but if anything it just disperses the dust more. CP says they started using some sort of vacuum vehicle instead that seems to work better. CP says he has called the city for the past 3 years about the issue but they keep ignoring him. I then went to APAS and talked to Sean, a worker under Alton Holsted. I called Holsted and he said Conn Co is responsible for the vacuum vehicle, and the last time they did anything was in September. I asked Holsted if he could spray water onto the property roads to keep dust down, and he said he will buy a tractor spray rig that he can use sometime in the next week. He said once they finish filling in the quarry the dust issue will go away, but in the meantime he will try to water things down.No observed violations during the visit, but source of concern will take preventative measures to lower airborne dust rates.

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
Concern No. 53691 Concern Info CP states that Missouri Prime Beef trucks are leaking onto public roadways prior to entering application site. CP also states that large amounts of dust are emitting from the haul road on the application site and accumulating onto their property								
Comments SharePoint #5328 ??I have visited this concern location numerous times. I have not observed spreading on the roadway since the visit on April 14, 2023, resulting in Notice of Violation #SW230027. MPB contacted all haulers contracted and notified them of the requirements and restrictions on application Best Management Practices. The Department does not regulate road dust.								
SWRO	6/7/2023	6/7/2023	Unknown	Fairview Newton	Odor	TW		
Concern No. 53728 Concern Info Voicemail left at front desk - odor from someone spreading chicken litter at 17598 Big Spring Drive, Fairview, MO 64842								
Comments SharePoint #5358 The land application of poultry litter is an agricultural activity that is exempt from odor regulations. No violation as this is an exempted activity.								
SWRO		6/8/2023	Denali Water Solutions	Newton	Odor			
Concern No. 53724 Concern Info Smell and odor from land application of fertilizer. Trucks have Denali on them.								
Comments SharePoint #5367

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
Concern No. 53725 Concern Info Fugitive dust is coming from Blevins asphalt plant located at the eastern city limits of Republic. Dust is covering vehicles located on Buddy's Auto Lot.								
Comments SharePoint #5362 I showed up to Blevin's asphalt and let Zach Totten, the current operating manager of the plant, know about the CP's complaint. I had visited Blevin's Asphalt a month beforehand, so I just reiterated many of my suggestions. I also suggested that Blevin's installs a tall metal wall or some trees along their property line to mitigate the amount of dust leaving their property. I did not observe any fugitive dust leaving Blevin's Asphalt during the investigation. No violations at this time.								
SWRO	6/26/2023	6/8/2023		Christian	Fugitive Particulate Matter Particulates Other	JW		
Concern No. 53727 Concern Info CP complaining about "abrasive" dust coming off rocks and trucks. He has contacted the city and planning legal action but wanted to talk to dnr to see if we can "shut down" or get the construction company to comply. The CP has photos he will show the investigator. CP states he has COPD and is having trouble breathing with the dust. CP states he has talked with the construction company and asked them to use their water truck, but they have said they don't have one.								
Comments SharePoint #5353 I showed up to Allen's property to try and ask him what's going on. There was no answer after I knocked on the door, and no one answered the phone number provided either. I drove around the property and followed the CP's directions for about 15 minutes, and I didn't see any signs of ongoing construction. It appears the CP was concerned about road construction - As I was driving around I noticed some newly paved areas and some new drainage installations. All of the construction appears to have finished, save for some asphalt that needs to be laid. No construction workers were around when I visited. I later tried to call the number the CP provided again, but there was no answer. No Violations observed during the investigation.

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
Concern No. 53749 Concern Info Caller said the railroad has stacked creosote railroad ties by the charcoal plant and homeless people are burning them, caller concerned about breathing the smoke and health issues. Caller also phoned railroad and they have to go through protocol and couldn't move them currently.								
Comments SharePoint #5409 After arriving at the site of the concern, I observed a twenty-foot by eight-foot by seven-foot pile of railroad ties. The ties were stacked next to the tracks. I walked the tracks and around the pile area and found no signs of burning taking place. The concern states the reporting party has already contacted the railroad and they said they need to go through protocol before removing the ties. No violation validated at this time.
